Title: NESHAP for Friction Materials Manufacturing (Renewal).

ICR Numbers: EPA ICR Number 2025.04, OMB Control Number 2060-0481.

ICR Status: This ICR is scheduled to expire on July 31, 2008. Under OMB regulations, the Agency may continue to either conduct or sponsor the collection of information while this submission is pending at OMB. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, and displayed either by publication in the **Federal Register** or by other

appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: The National Emission Standards for Hazardous Air Pollutants (NESHAP) Reporting and Recordkeeping Requirements for the Friction Materials Manufacturing were proposed on October 4, 2001 (66 FR 50768) and promulgated on October 18, 2002 (67 FR 64498).

These standards apply to any new, reconstructed, or existing solvent mixers located at any friction materials manufacturing facility engaged in the manufacture of friction materials such as brake and clutch linings. A friction materials manufacturing facility is a major source of hazardous air pollutant (HAP) if it emits or has the potential to emit any single HAP at a rate of 9.07 megagrams (10 tons) or more per year or any combination of HAP at a rate of 22.68 megagrams (25 tons) or more per year.

Owners or operators must submit notification reports upon the construction or reconstruction of any friction materials manufacturing facility. Semiannual reports for periods of operation during which the emission limitation has exceeded (or reports certifying that no exceedances have occurred) also are required. Affected entities must retain reports and records for a total of five years: Two years at the site and the remaining three years at an off-site location.

Notifications are used to inform the Agency or delegated authority when a source becomes subject to the standard. The reviewing authority may then inspect the source to ensure that the pollution control devices are properly installed and that the operating standard is being met. The information generated by monitoring, recordkeeping, and reporting requirements described in this ICR are used by the Agency to ensure that facilities that are affected by the standard continue to operate the control equipment and achieve continuous compliance with the regulation.

An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB Control Number. The OMB Control Number for EPA's regulations are listed in 40 CFR part 9 and 48 CFR chapter 15, and are identified on the form and/or instrument, if applicable.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 162 hours per response. Burden means the total time,
