SUPPLEMENTARY INFORMATION:

Title of Collection: 2008 Survey of Doctorate Recipients.

OMB Approval Number: 3145-0020.

Type of Request: Intent to seek approval to extend an information collection for three years.

1. Abstract

The Survey of Doctorate Recipients (SDR) has been conducted biennially since the 1970s. The 2008 SDR will consist of a sample of individuals under age 76 who have earned a science, engineering or health doctorate from a U.S. university. The purpose of this longitudinal study is to provide national estimates on the doctoral science, engineering and health workforce and changes in employment, education and demographic characteristics of that workforce. The study is one of three components of the Scientists and Engineers Statistical Data System (SESTAT), which produces national estimates of the size and characteristics of the nation's science and engineering workforce.

The National Science Foundation Act of 1950, as subsequently amended, includes a statutory charge to " * * * provide a central clearinghouse for the collection, interpretation, and analysis of data on scientific and engineering resources, and to provide a source of information for policy formulation by other agencies of the Federal Government." The SDR is designed to comply with these mandates by

providing information on the supply and utilization of the nation's doctoral scientists and engineers. Collected data will be used to produce estimates of the characteristics of these individuals. They will also provide necessary input into the SESTAT data system, which produces national estimates of the size and characteristics of the country's science and engineering personnel. The Foundation uses this information to prepare congressionally mandated reports such as *Women, Minorities and Persons with Disabilities in Science and Engineering and Science and Engineering Indicators*. A public release file of collected data, designed to protect respondent confidentiality, will be made available to researchers on CD-ROM and on the World Wide Web.

The National Opinion Research Center (NORC) at the University of Chicago will conduct the study for NSF. Data collection will begin in October 2008 by mail, Web survey and computer-assisted telephone interview. The survey will be collected in conformance with the Confidential Information Protection and Statistical Efficiency Act of 2002 and Privacy Act of 1974. The individual's response to the survey is voluntary. NSF will insure that all information collected will be kept strictly confidential and will be used only for research or statistical purposes.

2. Expected Respondents

A statistical sample of approximately 42,600 persons, identified as having a doctorate in a science, engineering or health field from a U.S. university will be contacted. The total response rate in 2006 was 79%.

3. Burden on the Public

The amount of time to complete the questionnaire may vary depending on an individual's circumstances; however, on average it will take approximately 25 minutes to complete the survey. Assuming an 80% response rate, NSF estimates that the total burden for the 2008 SDR will be 15,200 hours.

Dated: May 12, 2008.

Foundation.*
