Brake Rotors From the People's Republic of China: Revocation of Antidumping Duty Order Pursuant to Second Five-Year (Sunset) Review

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

SUMMARY: As a result of the determination by the United States International Trade Commission ("ITC") that revocation of the existing antidumping duty ("AD") order on brake rotors from the People's Republic of China ("PRC") would not be likely to lead to continuation or recurrence of material injury to an industry in the United States within a reasonably foreseeable time, the Department of Commerce (the "Department") is publishing this notice of revocation of the AD order.

DATES: *Effective Date:* June 25, 2008.

FOR FURTHER INFORMATION CONTACT: Frances Veith or Juanita Chen, AD/CVD Operations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; *telephone:* 202-482-4295 and 202-482-1904, respectively.

SUPPLEMENTARY INFORMATION:

Background

On April 17, 1997, the Department published the AD order on brake rotors

from the PRC.¹ On July 2, 2007, the Department published the notice of initiation of the sunset review of the AD duty order on brake rotors from the PRC pursuant to section 751(c) of the Tariff Act of 1930, as amended ("the Act"). See *Initiation of Five-Year ("Sunset") Reviews*, 72 FR 35968 (July 2, 2007) ("*Initiation Notice*"). As a result of its review, the Department found that revocation of the AD order would be likely to lead to continuation or recurrence of dumping and notified the ITC of the margins likely to prevail were the order revoked. See *Brake Rotors from the People's Republic of China: Notice of Final Results of Expedited Second Sunset Review of Antidumping Duty Order*, 73 FR 1319 (January 8, 2008) ("*Brake Rotors Final*").

On May 29, 2008, the ITC determined, pursuant to section 751(c) of the Act, that revocation of the AD order on brake rotors from the PRC would not be likely to lead to continuation or recurrence of material injury to an industry in the United States within a reasonably foreseeable time. The ITC notified the Department on June 12, 2008, and published its decision on June 18, 2008. See *Brake Rotors From China: Investigation No. 731-TA-744 (Second Review)*, 73 FR 34790 (June 18, 2008) and ITC Publication 4009 Inv. No. 731-TA-744 (Second Review) (June 2008).

Scope of the Order

The products covered by this order are brake rotors made of gray cast iron, whether finished, semifinished, or unfinished, ranging in diameter from 8 to 16 inches (20.32 to 40.64 centimeters) and in weight from 8 to 45 pounds (3.63 to 20.41 kilograms). The size parameters (weight and dimension) of the brake rotors limit their use to the following types of motor vehicles: automobiles, all-terrain vehicles, vans and recreational vehicles under "one ton and a half," and light trucks designated as "one ton and a half."

Finished brake rotors are those that are ready for sale and installation without any further operations. Semi-finished rotors are those on which the surface is not entirely smooth, and have undergone some drilling. Unfinished rotors are those which have undergone some grinding or turning.

These brake rotors are for motor vehicles, and do not contain in the casting a logo of an original equipment manufacturer ("OEM") which produces vehicles sold in the United States (e.g., General Motors, Ford, Chrysler, Honda,
