SUPPLEMENTARY INFORMATION:

I. Abstract

The National Institute of Standards and Technology (NIST) sponsors the Manufacturing Extension Partnership (MEP), a national network of fifty-nine (59) locally based manufacturing extension centers working with small manufacturers to help them improve their productivity, profitability, and enhance their overall economic competitiveness.

NIST MEP surveys all clients provided substantive services and collects data on sales, investment, cost savings, and jobs impacts as well as a limited set of qualitative questions. NIST MEP surveys center clients for two primary purposes:

- To collect aggregate information on program performance indicators to report to various stakeholders on program performance. The survey provides information about the quantifiable impacts that clients attribute to the services provided by MEP centers. NIST MEP also conducts other episodic studies to evaluate the system's impact that corroborate and complement the survey results.

- To provide center-specific program performance and impact information for center use. Centers use this information to communicate results to their own stakeholders, at both the state and federal level. Center management and NIST MEP use these results to evaluate center performance and effectiveness. The MEP Center Review Criteria and review process place strong emphasis on a center's ability to demonstrate impacts based on the survey results.

The specific information obtained from clients about the impact of MEP services is essential for NIST officials to monitor and report on program performance and plan program improvements aimed at improving program efficiency and effectiveness. This information is not available from existing programs or other sources. The collection of information is currently conducted by a contractor. This submission under the Paperwork

Reduction Act represents a request for an extension of a currently approved collection.

II. Method of Collection

The survey data will be collected through a combination of phone and web-based surveys.

SUPPLEMENTARY INFORMATION:

I. Abstract

Regulations at 50 CFR part 300, Subpart J, govern U.S. fishing in the economic zone of the Russian Federation. Russian authorities may permit U.S. fishermen to fish for allocations of surplus stocks in the Russian Economic Zone. The permit application information is sent to the National Marine Fisheries Service (NMFS) for transmission to Russia. If Russian authorities issue a permit, the vessel owner or operator must submit a permit abstract report to NMFS, and also report 24 hours before leaving the U.S. Exclusive Economic Zone (EEZ) for the Russian Economic Zone and 24 hours before re-entering the EEZ after being in the Russian Economic Zone.

The permit application information is used by Russian authorities to determine whether to issue a permit. NMFS uses the other information to help ensure compliance with Russian and U.S. fishery management regulations.

II. Method of Collection

Forms are used for applications. Submission of copies of permits, vessel abstract reports, and departure and return messages are provided by fax.

SUPPLEMENTARY INFORMATION:

I. Abstract

The National Marine Fisheries Service (NMFS) Alaska Region Groundfish Observer Program (Observer Program) collects and disseminates catch, bycatch, and biological data necessary to support in-season monitoring and stock assessment of fisheries in the Exclusive Economic Zone off the coast of Alaska. Owners of vessels, shoreside processors, and stationary floating processors are required to carry observers and must arrange for observer services from an observer provider. Although the vessel and plant owners pay for the cost of the observers, the costs associated with managing the program are paid by NMFS. A list of observer providers is available from the Observer Program's home page at http://www.afsc.noaa.gov/refm/observers/observer_providers.htm. The main focus of this information collection continues to be the documentation required by NMFS from an observer provider. Observer providers are permitted by NMFS to hire and deploy qualified individuals as observers in the Alaska Region groundfish fisheries. Observer candidates are required to meet specified criteria in order to qualify as an observer and must successfully complete an initial certification training course, as well as meet other criteria, prior to being certified.

II. Method of Collection

Paper applications, electronic reports, and telephone calls are required from participants, and methods of submittal include Internet and facsimile transmission of paper forms.
