SUPPLEMENTARY INFORMATION: The draft EIS/EIR documents the direct, indirect, and cumulative effects to the physical, biological, and socioeconomic environment that may result from various resource management alternatives at Millerton Lake.

The Millerton Lake draft EIS/EIR evaluates the existing resource management of Millerton Lake. The project purpose consists of: (1) Identifying the current and most appropriate future uses of land and water resources within the Plan Area; (2) identifying the long-term resource programs and implementation guidelines to manage and develop recreation, natural, and cultural resources; and (3) developing strategies and approaches to protect and preserve the natural, recreational, aesthetic, and cultural resources.

Millerton Lake is an existing reservoir formed by Friant Dam, and located in Fresno and Madera Counties, CA. The dam, which regulates the normal flow of the San Joaquin River and stores floodwaters for irrigation diversion into the Friant-Kern and Madera Canals, was completed in 1947. Millerton Lake has a storage capacity of 520,500 acre-feet

and a surface area of 4,900 acres. Through agreements with Reclamation and the California Department of Fish and Game, the CDPR manages the entire Plan Area.

The most recent General Plan for the Plan Area was completed by CDPR in 1983, and projected recreation trends and deficiencies through 1990. Since the adoption of this plan, several changes to the physical and regulatory environment have resulted in the need for an updated plan. The new joint Resource Management Plan/General Plan (RMP/GP) will have a planning horizon through the year 2035.

The new plan will: (1) Enhance natural resources and recreational opportunities without interrupting reservoir operations; (2) provide recreational opportunities to meet the demands of a growing, diverse population; (3) ensure recreational diversity and quality; (4) protect natural, cultural, and recreational sources while providing resource education opportunities and stewardship; and (5) provide updated management for establishing a new management agreement with the State of California.

The draft EIS/EIR outlines the formulation and evaluation of alternatives designed to address these issues through a representation of the varied interests at the Plan Area. The No Action Alternative would result in the continuation of current management practices. Action Alternative 1 (Recreation Expansion) emphasizes expanded recreation opportunities and includes additional campsites. Action Alternative 2 (Enhancement) balances natural and cultural resource protection and recreation opportunities. Action Alternative 3 (Resource Protection) emphasizes resource protection and limits some recreation opportunities.

The draft EIS/EIR has been developed within the authorities provided by Congress through the Reclamation Recreation Management Act of 1992 (Pub. L. 102-575, Title 28, 16 U.S.C. 460L) and other applicable agency and U.S. Department of Interior policies.
