

ATAA, the group eligibility requirements of Section 246 of the Trade Act, as amended, must be met. The Department has determined in this case that the requirements of Section 246 have been met.

A significant number of workers at the firm are age 50 or over and possess skills that are not easily transferable. Competitive conditions within the industry are adverse.

Conclusion

After careful review of the facts obtained in the investigation, I determine that there was a shift in production from the workers' firm or subdivision to China, Pakistan and India of articles that are like or directly competitive with those produced by the subject firm or subdivision, and there has been or is likely to be an increase in imports of like or directly competitive articles. In accordance with the provisions of the Act, I make the following certification:

All workers of Dan River, Inc., Danville Operations, Danville, Virginia, who became totally or partially separated from employment on or after April 14, 2007, through two years from the date of this certification, are eligible to apply for adjustment assistance under Section 223 of the Trade Act of 1974, and are eligible to apply for alternative trade adjustment assistance under Section 246 of the Trade Act of 1974.

Signed in Washington, DC, this 27th day of August 2008.

Elliott S. Kushner,

Certifying Officer, Division of Trade Adjustment Assistance.

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-243]

Oregon State University Triga Reactor; Notice of Issuance of Environmental Assessment and Finding of No Significant Impact

The U.S. Nuclear Regulatory Commission (NRC) is considering issuance of a renewed Facility License No. R-106, to be held by the Oregon State University (OSU or the licensee), which would authorize continued operation of the Oregon State University TRIGA Reactor (OSTR), located in Corvallis, Benton County, Oregon. Therefore, pursuant to 10 CFR 51.21, the NRC is issuing an Environmental Assessment and Finding of No Significant Impact.

Description of Proposed Action

The proposed action is approval of the licensee's application for renewal of Facility License No. R-106 for a period of 20 years from the date of issuance of the renewed license. The proposed action is in accordance with the licensee's application dated October 5, 2004, as supplemented on August 8, 2005, May 24, 2006, November 10, 2006, November 21, 2006, July 10, 2007, July 27, 2007, July 31, 2007, August 6, 2007, April 14, 2008, August 6, 2008 and August 11, 2008.

The OSTR is located in the OSU Radiation Center complex on the west end of the Oregon State University campus and west of downtown Corvallis, OR. Corvallis and OSU lie in Benton County in the Willamette Valley. The OSTR site comprises the area bounded by the Reactor Building fence on the north, Jefferson Way on the south, 35th Street on the west, and the east edge of the OSU Radiation Center complex parking lot on the east. The nearest permanent residence is located 876 feet (267 m) north of the OSTR. There are no nearby industrial, transportation, or military facilities that pose a threat to the OSTR.

The OSTR is a tank-type, light water moderated and cooled research reactor licensed to operate at a steady-state power level of 1.1 megawatts thermal power (MW(t)). The reactor is licensed

to operate in a pulse mode, with a maximum reactivity insertion of \$2.55. A detailed description of the reactor can be found in the OSTR Safety Analysis Report (SAR). The major modifications to the Facility License were a power uprate to 1.0 MW(t) in June, 1971, and a power uprate to 1.1 MW(t) in December, 1989.

The licensee has not requested any changes to the facility design or operating conditions as part of this renewal request. The proposed action will not increase the probability or consequences of accidents. No changes are being made in the types of effluents that may be released off site. There should be no increase in occupational or public radiation exposure. Therefore, license renewal should not change the environmental impact of facility operation.

Summary of the Environmental Assessment

The NRC staff reviewed the licensee's application which included an Environmental Report. To document its review, the NRC staff has prepared an environmental assessment (EA) which discusses the OSTR site and facility; radiological impacts of gaseous, liquid, and solid effluents; environmental and personnel radiation monitoring; radiation dose estimates for the maximum hypothetical accident (MHA); impacts of the "no action" alternative to the proposed action; alternative use of resources; considerations related to the National Environmental Policy Act (NEPA); and presents the radiological and non-radiological environmental impacts of the proposed action.

Finding of No Significant Impact

On the basis of the environmental assessment, the NRC concludes that the proposed action will not have a significant effect on the quality of the human environment. Accordingly, the NRC has determined not to prepare an environmental impact statement for the proposed action.

Publicly available records will be accessible electronically from the Agencywide Documents Access and Management System (ADAMS) Public Electronic Reading Room on the NRC Web site <http://www.nrc.gov/reading-rm/adams.html>. For further details with respect to the proposed action, see the licensee's letter dated October 5, 2004, (ADAMS Accession No. ML043270077 and No. ML071430452), as supplemented by letters dated August 8, 2005 (ADAMS Accession No. ML052290051); May 24, 2006 (ADAMS Accession No. ML061510355); November 10, 2006 (ADAMS Accession

No. ML063210182); November 21, 2006 (ADAMS Accession No. ML063320500); July 10, 2007 (ADAMS Accession No. ML072150361 and ML072150362); July 27, 2007 (ADAMS Accession No. ML072150363); July 31, 2007 (ADAMS Accession No. ML 072190043); August 6, 2007 (ADAMS Accession No. ML072340580); April 14, 2008 (ADAMS Accession No. ML081150194); August 6, 2008 (ADAMS Accession No. ML082261409); and August 11, 2008 (ADAMS Accession No. ML082270383). Documents may be examined, and/or copied for a fee, at the NRC's Public Document Room (PDR), located at One White Flint North, 11555 Rockville Pike (first floor), Rockville, Maryland. The EA can be found in ADAMS under Accession Number ML061650197. Persons who do not have access to ADAMS or who encounter problems in accessing the documents located in ADAMS should contact the NRC PDR Reference staff at 1-800-397-4209, or 301-415-4737, or send an e-mail to pdr@nrc.gov.

Dated at Rockville, Maryland, this 2nd day of September, 2008.

For the Nuclear Regulatory Commission.

Daniel S. Collins,

Chief, Research and Test Reactors Branch
A, Division of Policy and Rulemaking, Office
of Nuclear Reactor Regulation.
