SUPPLEMENTARY INFORMATION:

I. Background

Pursuant to the savings clause in the Homeland Security Act of 2002, Public Law 107-296, Section 1512, 116 Stat. 2310 (November 25, 2002), the Department of Homeland Security (DHS) and its components and offices have relied on preexisting Privacy Act systems of records notices for the collection and maintenance of records that account for children enrolled in DHS-sponsored childcare programs.

As part of its efforts to streamline and consolidate its Privacy Act records systems, DHS is establishing a new agency-wide system of records under the Privacy Act (5 U.S.C. 552a) for DHS childcare records. This will ensure that all components of DHS follow the same privacy rules for collecting and maintaining childcare records regarding DHS employees, other Federal employees, and other individuals who

use DHS-sponsored childcare programs. DHS and its components and offices will use the system to account for DHS employees, other Federal employees, and other individuals who use DHS-sponsored childcare programs and their children.

In accordance with the Privacy Act of 1974, DHS is giving notice that it proposes to reclassify one legacy record system titled, DOT/CG 634 Childcare Program Record System (65 FR 19475 April 11, 2000), as a new DHS-wide records system, titled Childcare. This system will allow DHS to collect and maintain Department-sponsored childcare program records. Categories of individuals, categories of records, and the routine uses of this legacy system of records notice have been reviewed and updated to better reflect the Department's childcare record system. This updated system will be included DHS's inventory of record systems.

II. Privacy Act

The Privacy Act embodies fair information principles in a statutory framework governing the means by which the United States Government collects, maintains, uses, and disseminates individuals' records. The Privacy Act applies to information that is maintained in a "system of records." A "system of records" is a group of any records under the control of an agency for which information is retrieved by the name of an individual or by some identifying number, symbol, or other identifying particular assigned to the individual. In the Privacy Act, an individual is defined to encompass United States citizens and legal permanent residents. As a matter of policy, DHS extends administrative Privacy Act protections to all individuals where systems of records maintain information on U.S. citizens, lawful permanent residents, and visitors. Individuals may request access to their own records that are maintained in a system of records in the possession or under the control of DHS by complying with DHS Privacy Act regulations, 6 CFR part 5.

The Privacy Act requires each agency to publish in the **Federal Register** a description denoting the type and character of each system of records that the agency maintains, and the routine uses that are contained in each system in order to make agency recordkeeping practices transparent, to notify individuals regarding the uses of their records, and to assist individuals to more easily find such files within the agency. Below is the description of the Childcare System of Records.
