The NLIP is located in Sacramento and Sutter Counties, California. SAFCA is requesting this permission and permit

in order to complete construction along the Natomas Cross Canal and on the landside of the east levee of the Sacramento River.

2. Alternatives

The EIS will address an array of flood control improvement alternatives. Alternatives analyzed during the investigation will include a combination of one or more flood protection measures. These measures include seepage berms, adjacent setback levees, seepage wells, seepage cutoff walls, and relocation of irrigation ditches.

3. Scoping Process

a. A public scoping meeting was held on January 9, 2008 to present information to the public and to receive comments from the public. The Corps has initiated a process to involve concerned individuals, and local, State, and Federal agencies.

b. Significant issues to be analyzed in depth in the EIS include effects on hydraulic, wetlands and other waters of the U.S., vegetation and wildlife resources, special-status species, esthetics, cultural resources, recreation, land use, fisheries, water quality, air quality, transportation, and socioeconomics; and cumulative effects of related projects in the study area.

c. The Corps is consulting with the State Historic Preservation Officer to comply with the National Historic Preservation Act, and the U.S. Fish and Wildlife Service to provide a Fish and Wildlife Coordination Act Report as an appendix to the EIS.

d. A 45-day public review period will be provided for individuals and agencies to review and comment on the draft EIS. All interested parties are encouraged to respond to this notice and provide a current address if they wish to be notified of the draft EIS circulation.
