**SUPPLEMENTARY INFORMATION:** The Corporation is particularly interested in comments that:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Corporation, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are expected to respond, including the

use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology (e.g., permitting electronic submissions of responses).

#### Background

These application instructions will be used by applicants for funding through AmeriCorps State and National grant competitions.

*Current Action:* The Corporation seeks to renew and revise the current AmeriCorps State and National Application Instructions. The Application Instructions are being revised for increased clarity. The Application Instructions will be used in the same manner as the existing Application Instructions. The Corporation also seeks to continue using the current Application Instructions until the revised Application Instructions are approved by OMB. The current form is due to expire on April 30, 2009.

*Type of Review:* Renewal.

*Agency:* Corporation for National and Community Service.

*Title:* AmeriCorps Application Instructions: State Competitive, State Education Award Program, National Direct, National Direct Education Award Program, National Professional Corps, Indian Tribes, States and Territories without Commissions, and National Planning.

*OMB Number:* 3045-0047.

*Agency Number:* None.

*Affected Public:* Nonprofit organizations, State, Local and Tribal.

*Total Respondents:* 600.

*Frequency:* Annually.

*Average Time per Response:* 24 hours.

*Estimated Total Burden Hours:* 14,400 hours.

*Total Burden Cost (capital/startup):* None.

*Total Burden Cost (operating/maintenance):* None.

Comments submitted in response to this notice will be summarized and/or included in the request for Office of Management and Budget approval of the information collection request; they will also become a matter of public record.

Dated: October 8, 2008.

## **POLICY JUSTIFICATION**

### **United Arab Emirates - UH-60M BLACK HAWK Helicopters**

**The Government of United Arab Emirates (UAE) has requested a possible sale of 14 UH-60M BLACK HAWK helicopters with engines; 6 T700-GE-701D spare engines; 14 each AN/ALQ-144A(V)3 Infrared (IR) Countermeasure Sets, AN/APR-39A(V)4 Radar Signal Detecting Sets, AAR-57(V)3 Common Missile Warning Systems, and AN/AVR-2B Laser Warning Sets; Weaponization of 23 UH-60M BLACK HAWK helicopters; 390 AGM-114N HELLFIRE missiles; 8 HELLFIRE training missiles; 30 M299 HELLFIRE launchers; 23,916 MK-66 Mod 4 2.75" Rocket Systems in the following configuration: 1,000 M229 High Explosive Point Detonate, 540 M255A1 Flechette, 1,152 M264 RP Smoke, 528 M274 Smoke Signature, 495 M278 Flare, 720 M274 Infrared Flare, 20,016 HA23 Practice; 22 GAU-19 Gatling Gun Systems; and 93 M-134 Mini-Gun. Also included: spare and repair parts, publications and technical data, support equipment, personnel training and training equipment, ground support, communications equipment, U.S. Government and contractor technical and logistics personnel services, aircraft survivability equipment, tools and test equipment, and other related elements of logistics support. The estimated cost is \$774 million.**

**This proposed sale will contribute to the foreign policy and national security of the United States by helping to improve the security of a friendly country that has been and continues to be an important force for political stability and economic progress in the Middle East.**

**The United Arab Emirates (UAE) plans to increase its air mobility capability and existing helicopter fleet. The UH-60M BLACK HAWK helicopters will be used for various military operations to include the protection of sovereign borders as well as the protection and defense of U.S. and coalition strategic facilities. The proposed purchase of UH-60M BLACK HAWK helicopters will greatly enhance the UAE's military functionality by increasing deterrence capabilities. The UAE will have no difficulty absorbing these helicopters into its armed forces.**

**The proposed sale of this equipment and support will not affect the basic military balance in the region.**

**The principal contractors will be: Sikorsky Aircraft Corporation of Stratford, Connecticut, and General Electric of Lynn, Massachusetts. The purchaser has requested offsets; however, at this time, agreements are undetermined and will be defined in negotiations between the purchaser and contractor.**

---

**Implementation of this proposed sale will require the assignment of 6-8 Contractor Field Service representatives to the United Arab Emirates for approximately two years after initial fielding to assist in the delivery and deployment of the helicopters.**

**There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.**

**Transmittal No. 08-66****Notice of Proposed Issuance of Letter of Offer  
Pursuant to Section 36(b)(1)  
of the Arms Export Control Act****Annex  
Item No. vii****(vii) Sensitivity of Technology:**

**1. The UH-60M BLACK HAWK helicopters contain communications and identification equipment, navigation equipment, aircraft survivability equipment, displays and sensors. The airframe itself does not contain sensitive technology. The highest level of classified information to be released for training, operation and maintenance of the BLACK HAWK helicopters is Unclassified. The highest level that could be revealed through reverse engineering or testing of the end item is Secret.**

**2. The UH-60M BLACK HAWK helicopters will include the following pertinent equipment listed below, either installed on the aircraft or included in the proposed sale:**

**a. The AN/APR-39A(V)4 Radar Signal Detecting Set is a system which provides warning of a radar directed air defense threat to allow appropriate countermeasures. Hardware is classified Confidential when programmed with United States threat data; releasable technical manuals for operation and maintenance are classified Confidential; releasable technical data (technical performance) is classified Secret. The system can be programmed with threat data provided by the purchasing country.**

**b. The AN/AVR-2B Laser Warning Set is a passive laser warning system that receives, processes and displays threat information resulting from aircraft illumination by lasers on the multi-functional display. The hardware is classified Confidential; releasable technical manuals for operation and maintenance are classified Secret. Reverse engineering is not a major concern.**

**c. The AN/ALQ-144A(V)3 Infrared (IR) Countermeasure Set is an active, continuous operating, omni-directional, electrically fired IR jammer system designed to confuse or decoy threat IR missile systems, in conjunction with low reflective paint and engine suppressors. Hardware is classified Confidential and releasable technical manuals for operation and maintenance are classified Secret. Reverse engineering and development of countermeasures are concerns if the hardware and releasable technical data are compromised to a competent adversary.**

**d. The AAR-57 Common Missile Warning System is a passive laser warning system that receives, processes, and displays threat information resulting from aircraft illumination by lasers on the multi-functional display. The Dispenser components and Payload Module components dispense expendables/decoys to enhance aircraft survivability. The system is designed to employ countermeasures according to a program developed and implemented by the aircrew. Radar cross-section and frequency coverage are sensitive elements. The hardware is Unclassified. Releasable technical publications for operation and maintenance are classified Secret. Aircraft optimization is the critical element; reverse engineering is not a major concern. Additional components are the Control Panel and the Electronics Module that have been integrated in the Weapons Management and Control software.**

**e. AGM-114K3 and AGM-114N3 HELLFIRE missiles are designed to penetrate and destroy targets located in populated areas with a precision guidance system and specially designed warhead to minimize other damage. Vulnerability data, countermeasures, vulnerability/susceptibility analyses, and threat definitions are classified Secret or Confidential. Reverse engineering could reveal Confidential information. Susceptibility of HELLFIRE missile to diversion or exploitation is considered low risk. Components of the system are also considered highly resistant to reverse engineering. Performance and system specifications are classified Secret. The hardware and its components are Unclassified.**

**f. The Bright Star II Electro-Optical System is a long-range, multi-sensor targeting and target designation system. It is considered non-standard equipment for the UH-60 BLACKHAWK helicopter. It is used to designate and target opposing forces for employment of the HELLFIRE weapon system, and 2.75" rockets. The hardware is Unclassified. Rangefinder performance and signal transfer function for the Infrared Imager are considered Confidential.**

**3. If a technologically advanced adversary were to obtain knowledge of the specific hardware or software in this proposed sale, the information could be used to develop countermeasures which might reduce weapon system effectiveness or be used in the development of a system with similar or advance capabilities.**
