

effectiveness of specified intervention strategies such as cultural enrichment activities, educational and vocational services, and/or computer-based curricula; and (3) determine the success of the program in delaying, preventing, and/or reducing the use of alcohol, tobacco, and other drugs (ATOD) among the target populations. The grantees are expected to provide an effective prevention process, direction, and a common set of goals, expectations, and accountabilities to be adapted and integrated at the community level. While the grantees have substantial flexibility in choosing their individual evidence-based programs, they are all required to base them on the five steps of the SPF to build service capacity specific to SA, HIV, and hepatitis prevention services. In FY 2006, all the grantees initiated Steps 1–3 of the SPF, namely conducting a needs assessment, building capacity, and planning how to implement their projects. Once their plans have been approved by their Government Project Officers they can precede onto Step 4 (implementation) and Step 5 (evaluation). Conducting this cross-site evaluation will assist

SAMHSA/CSAP in promoting and disseminating optimally effective prevention programs. Grantees must also conduct ongoing monitoring and evaluation of their projects to assess program effectiveness including Federal reporting of the Government Performance and Results Act (GPRA) of 1993, the Performance Assessment Rating Tool (PART), SAMHSA/CSAP National Outcome Measures (NOMs), and HIV counseling and testing. All of this information will be collected through self-report questionnaires administered to program participants. All grantees will use two instruments, one for youth between the ages of 12 and 17, and one for adults 18 and older. These instruments include baseline, exit and 3–6 month follow-up (post-exit) questionnaires related to GPRA and NOMs augmented by questions pertaining to HIV and hepatitis. While the GPRA and NOMs measures have already been approved by OMB (OMB No. 0930–0230), the remaining HIV and hepatitis-related questions have not, hence this data collection. Each questionnaire contains

135 questions, of which 102 relate to HIV and hepatitis. Sample size, respondent burden, and intrusiveness have been minimized to be consistent with the cross-site objectives. Procedures are employed to safeguard the privacy and confidentiality of participants. Every effort has been made to coordinate cross-site data collection with local data collection efforts in an attempt to minimize respondent burden. The cross-site evaluation results will have significant implications for the substance abuse, HIV/AIDS and hepatitis prevention fields, the allocation of grant funds, and other evaluation activities conducted by multiple Federal, State, and local government agencies. They will be used to develop Federal policy in support of SAMHSA/CSAP program initiatives, inform the public of lessons learned and findings, improve existing programs, and promote replication and dissemination of effective prevention strategies. The following table shows the estimated annualized burden for data collection.

	Number of respondents at baseline	Number of respondents at exit	Number of respondents at follow-up	Average burden/response (hrs.)	Total burden hours
Total of Adults and Youth	9,000	6,750	4,455	0.83	16,770

Written comments and recommendations concerning the proposed information collection should be sent by December 1, 2008 to: SAMHSA Desk Officer, Human Resources and Housing Branch, Office of Management and Budget, New Executive Office Building, Room 10235, Washington, DC 20503. Due to potential delays in OMB's receipt and processing of mail sent through the U.S. Postal Service, respondents are encouraged to submit comments by fax to: 202–395–6974.
