Title: Application for New and Amended Pesticide Registration.

ICR numbers: EPA ICR No. 0277.15, OMB Control No. 2070-0060.

ICR Status: This ICR is scheduled to expire on November 30, 2008. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. An

Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: This data collection program is designed to provide EPA with necessary data to evaluate an application of a pesticide product as required under section 3 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and Federal Food, Drug, and Cosmetic Act (FFDCA), as amended. Under FIFRA, EPA must evaluate pesticides thoroughly before they can be marketed and used in the United States to ensure that they will not pose unreasonable adverse effects to human health and the environment. Pesticides that meet this test are granted a license or "registration" which permits their distribution, sale, and use according to requirements set by EPA to protect human health and the environment. An individual or entity wanting to obtain a registration for a pesticide product must submit an application package consisting of information relating to the identity and composition of the product, proposed labeling, and supporting data (or compensation for others' data) for the product as outlined in 40 CFR part 158. EPA bases registration decisions for pesticides on its evaluation of a battery of test data provided primarily by applicants for registration. Required studies include testing to show whether a pesticide has the potential to cause unreasonable adverse human health or environmental effects. If EPA's evaluation of the data shows that the statutory requirements of FIFRA are met, then a registration is approved. Under FIFRA all pesticides must be registered by EPA before they may be sold or distributed in U.S. commerce.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information will vary and is expected to range from 14 to 646 hours per response, depending on the type of response submitted. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed

to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Individuals or entities engaged in activities related to the registration of a pesticide product.

Estimated Number of Respondents: 1,725.

Frequency of Response: On occasion.

Estimated Total Annual Hour Burden: 76,180.

Estimated Total Annual Cost: \$5,528,541.

Changes in the Estimates: There is a decrease of 76,794 hours in the total estimated burden currently identified in the OMB Inventory of Approved ICR Burdens. This decrease reflects a substantial decline in the number of estimated responses. This change is an adjustment.

Dated: November 7, 2008.

John Moses,

Acting Director, Collection Strategies Division.

Title: State Review Framework.

ICR numbers: EPA ICR No. 2185.03, OMB Control No. 2020-0031.

ICR Status: This ICR is scheduled to expire on November 30, 2008. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: The State Review Framework ("Framework") is an oversight tool designed to assess state performance in enforcement and compliance assurance. The Framework's goal is to evaluate state performance by examining existing data to provide a consistent level of oversight and develop a uniform mechanism by which EPA Regions, working collaboratively with their states, can ensure that state environmental agencies are consistently implementing the national compliance and enforcement program in order to meet agreed-upon goals. Furthermore, the Framework is designed to foster dialogue on enforcement and compliance performance between the states that will enhance relationships and increase feedback, which will in turn lead to consistent program management and improved environmental results. This amendment will allow EPA to collect information from enforcement and compliance files reviewed during routine on-site visits of state or local agency offices that will assist in the evaluation of the State Review Framework implementation from FY 2009 to the end of FY 2011. Also, this request will allow EPA to make inquiries to assess the State Review Framework process, including
