SUPPLEMENTARY INFORMATION:

Background

On September 24, 2007, U.S. Customs and Border Protection (CBP) published in the **Federal Register** (72 FR 54277) a Notice of Intent to prepare an EIS to identify and assess the potential impacts associated with the construction, operation, and maintenance of tactical infrastructure, to include a primary pedestrian fence, supporting patrol roads, and other infrastructure in two distinct sections along the U.S./Mexico international border within CBP's San Diego Border Patrol Sector (Proposed Action). The EIS complies with NEPA, the Council on Environmental Quality regulations in 40 CFR Parts 1500–1508, and Department of Homeland Security (DHS) Management Directive 5100.1, *Environmental Planning Program*.

The mission of CBP is to prevent terrorists and terrorist weapons from entering the U.S., while also facilitating the flow of legitimate trade and travel. In supporting CBP's mission, the Border Patrol is charged with establishing and maintaining effective control of the U.S. border between ports of entry. The purpose of the Proposed Action is to provide Border Patrol agents with the tools necessary to strengthen their control of the U.S. border between ports of entry in the San Diego Sector. The Proposed Action also provides a safer work environment and enables Border Patrol agents to enhance response time.

The Proposed Action would consist of constructing a primary pedestrian fence, patrol roads, access roads, and other infrastructure in two sections. The first proposed section would be approximately 3.6 miles in length and would start at Puebla Tree and end at Boundary Monument 250. A newly
