

III. Registration Reviews

A. What Action is the Agency Taking?

As directed by FIFRA section 3(g), EPA is reviewing the pesticide registrations identified in the table in this unit to assure that they continue to

satisfy the FIFRA standard for registration - that is, they can still be used without unreasonable adverse effects on human health or the environment. A pesticide's registration review begins when the Agency

establishes a docket for the pesticide's registration review case and opens the docket for public review and comment. At present, EPA is opening registration review dockets for the cases identified in the following table.

TABLE—REGISTRATION REVIEW DOCKETS OPENING

Registration Review Case Name and Number	Docket ID Number	RAL, Telephone Number, E-mail Address
Garlic Oil; Case 4007	EPA-HQ-OPP-2009-0113	Cheryl Greene, (703) 308-0352; greenec.cheryl@epa.gov
Capsaicin; Case 4018	EPA-HQ-OPP-2009-0121	Chris Pfeifer, (703) 308-0031; pfeifer.chris@epa.gov

B. Docket Content

1. *Review dockets.* The registration review dockets contain information that the Agency may consider in the course of the registration review. The Agency may include information from its files including, but not limited to, the following information:

- An overview of the registration review case status.
- A list of current product registrations and registrants.
- **Federal Register** notices regarding any pending registration actions.
- **Federal Register** notices regarding current or pending tolerances.
- Risk assessments.
- Bibliographies concerning current registrations.
- Summaries of incident data.
- Any other pertinent data or information.

Each docket contains a document summarizing what the Agency currently knows about the pesticide case and a preliminary work plan for anticipated data and assessment needs. Additional documents provide more detailed information. During this public comment period, the Agency is asking that interested persons identify any additional information they believe the Agency should consider during the registration reviews of these pesticides. The Agency identifies in each docket the areas where public comment is specifically requested, though comment in any area is welcome.

2. *Other related information.* More information on these cases, including the active ingredients for each case, may be located in the registration review schedule on the Agency's website at http://www.epa.gov/oppsrrd1/registration_review/schedule.htm. Information on the Agency's registration review program and its implementing regulation may be seen at http://www.epa.gov/oppsrrd1/registration_review.

3. Information submission

requirements. Anyone may submit data or information in response to this document. To be considered during a pesticide's registration review, the submitted data or information must meet the following requirements:

- To ensure that EPA will consider data or information submitted, interested persons must submit the data or information during the comment period. The Agency may, at its discretion, consider data or information submitted at a later date.
- The data or information submitted must be presented in a legible and useable form. For example, an English translation must accompany any material that is not in English and a written transcript must accompany any information submitted as an audiographic or videographic record. Written material may be submitted in paper or electronic form.
- Submitters must clearly identify the source of any submitted data or information.
- Submitters may request the Agency to reconsider data or information that the Agency rejected in a previous review. However, submitters must explain why they believe the Agency should reconsider the data or information in the pesticide's registration review.

• As provided in 40 CFR 155.58, the registration review docket for each pesticide case will remain publicly accessible through the duration of the registration review process; that is, until all actions required in the final decision on the registration review case have been completed.

II. What Action is the Agency Taking?

Under section 408(d) of the FFDC, 21 U.S.C. 346a, EPA is authorized to establish tolerances for pesticide residues in or on food based on a petition from any person. Ordinarily, EPA resolves these petitions either by granting or denying them (21 U.S.C. 346a(d)(4)). EPA's regulations, however, allow petitions to be withdrawn by the petitioner without prejudice to refile the petition at a later date (40 CFR 180.8). EPA has received notifications from various petitioners withdrawing, partially or completely, the following tolerances: PP 0E6102, 1E6427, 2E6388, 2E6509, 4E6868, 5E7013, 5E7014, 5F7018, 6E7047, 6E7048, 6E7056, 6E7164, 6E7165, 7E7213, 7E7309, 7E7238, 7F7295 and 9E5075.
