

minnow traps, and backpack electrofishing. Fish would be captured, removed from nets or traps quickly and temporarily retained in cool, aerated water. Time spent handling fish would be kept to a minimum to limit stress. After handling, all fish would be allowed to recover in cool, aerated water, and released. When necessary, fish would be anaesthetized. The KCDNRP does not propose to kill any listed fish but a small number may die as an unintended result of the activities.

Permit 14271

The Washington State Department of Ecology (ECY) is requesting a 2-year scientific research permit to take juvenile and adult PS Chinook salmon, PS steelhead, and HC chum salmon. The purpose of the project is to develop a sampling plan that reports on the status of watershed health and salmon recovery efforts at three spatial scales: Water Resource Inventory Area, Salmon Recovery Region, and statewide. The goal is to develop a quality assurance monitoring plan for statewide probability-based sampling of aquatic habitat conditions and species diversity and abundance. The ECY's research application is for the pilot project which would take place in the Puget Sound, Hood Canal, and Strait of Juan de Fuca. The information gathered by this research would benefit listed salmonids by helping resource managers evaluate the effectiveness of habitat restoration efforts and the status and trends of aquatic species. The applicant proposes to capture fish with backpack and boat electrofishing equipment in at least fifty sites within the Puget Sound, Hood Canal, and Strait of Juan de Fuca. Listed fish would be enumerated and immediately released. The applicant does not propose to kill any listed fish species, but a small number may die as an unintended result of the activities.

Permit 14283

Environmental Assessment Services (EAS) is requesting a scientific research permit sample fish in the Columbia River in support of the U.S. Department of Energy's Hanford Site Cleanup Mission and regulatory drivers under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). The research would take place in four areas the Columbia River waters extending from upstream of Wanapum Dam to McNary Dam. The researchers are targeting non-listed resident fish but may also capture UCR steelhead and Chinook, MCR steelhead, and SR fall Chinook, spr/sum Chinook, and Steelhead. The research would benefit listed fish by helping monitor

and reduce contamination from the Hanford Nuclear Reservation. The researchers would capture the fish using electrofishing, hook and line, and long-line techniques. Any captured listed fish would immediately be released. The researchers do not propose to kill any listed fish but a small number may die as an unintended result of the activities.

Permit 14290

The NWFSC is seeking a permit to examine fish behavior and develop criteria to be used in designing effective screening and bypass systems at dams on the Columbia River (and elsewhere). Researchers would videotape juvenile SR fall Chinook salmon to determine if their behavior is altered in regard to velocity gradient changes in a test flume at McNary Dam. The research would benefit the fish by helping managers design safer, more efficient bypass units for fish to use when moving past hydroelectric facilities.

The fish would be collected from orifice traps installed within the bypass channel at McNary Dam and transferred to the test flume. They would then be video-taped as they approach and either pass through or reject an orifice in the McNary flume. Different flow conditions would be created by changing the head on the orifice. The researchers would then overlay a flow profile of the test area on the videos and determine specific areas and movements for the test fish. After testing, the fish would be returned to the bypass channel. The researchers do not propose to kill any of the fish being tested, but a small number may die as an unintended result of the activities.

Permit 14457

The Columbia River Estuary Study Taskforce (CREST) is seeking to renew research previously done under Permit 13508, while increasing the numbers of locations and fish to be taken. Under the new permit they would annually capture, handle, and release juvenile SR sockeye salmon, SR fall Chinook salmon, SR spring/summer Chinook salmon, UCR Chinook salmon, LCR Chinook salmon, UWR Chinook salmon, SR steelhead, UCR steelhead, MCR steelhead, LCR steelhead, UWR steelhead, LCR Coho, CR chum salmon, OC coho salmon, and green sturgeon. The research would take place in Baker Bay, Grays Bay, Washington and Youngs Bay, Oregon in the Columbia River estuary, and Ecola Creek, just south of the Columbia River confluence. The purpose of the research is to evaluate estuarine habitat restoration efforts. Specific objectives are to (1) determine

species composition, relative abundance, and residence time of various listed fish by using pre-restored and restoration project habitats and adjacent reference sites; (2) determine prey utilization by juvenile salmon; and (3) determine prey availability. The research would benefit listed salmonids by determining how effectively currently altered habitats support salmonids and using that information to guide future habitat modifications.

The CREST would capture the fish using fyke nets, trap nets, and beach seines. Salmonids would be anesthetized, identified, counted, measured, weighed, checked for tags and hatchery marks, and released. Some of the fish may be tagged with passive integrated transponders, or injected with dye or visible implant elastomers. Fin or scale samples for genetic or age analysis would be taken from a portion of the captured juvenile Chinook salmon. Some of the captured juvenile salmonid would be sampled for stomach contents. The CREST does not propose to kill any of the fish being captured, but a small number may die as an unintended result of the activities.

This notice is provided pursuant to section 10(c) of the ESA. NMFS will evaluate the applications, associated documents, and comments submitted to determine whether the applications meet the requirements of section 10(a) of the ESA and Federal regulations. The final permit decisions will not be made until after the end of the 30-day comment period. NMFS will publish notice of its final action in the **Federal Register**.

Dated: April 28, 2009.

Susan Pultz,

*Acting Chief, Endangered Species Division,
Office of Protected Resources, National
Marine Fisheries Service.*

BILLING CODE 3510-22-S

DEPARTMENT OF COMMERCE

International Trade Administration

Initiation of Five-Year ("Sunset") Review

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

SUMMARY: In accordance with section 751(c) of the Tariff Act of 1930, as amended ("the Act"), the Department of Commerce ("the Department") is automatically initiating a five-year review ("Sunset Review") of the antidumping duty orders listed below. The International Trade Commission

("the Commission") is publishing concurrently with this notice its notice of *Initiation of Five-Year Review* which covers the same order.

DATES: *Effective Date:* May 1, 2009.

FOR FURTHER INFORMATION CONTACT: The Department official identified in the *Initiation of Review* section below at AD/CVD Operations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street & Constitution Ave., NW., Washington, DC 20230. For information from the Commission

contact Mary Messer, Office of Investigations, U.S. International Trade Commission at (202) 205-3193.

SUPPLEMENTARY INFORMATION:

Background

The Department's procedures for the conduct of Sunset Reviews are set forth in its *Procedures for Conducting Five-Year ("Sunset") Reviews of Antidumping and Countervailing Duty Orders*, 63 FR 13516 (March 20, 1998) and 70 FR 62061 (October 28, 2005). Guidance on methodological or

analytical issues relevant to the Department's conduct of Sunset Reviews is set forth in the Department's Policy Bulletin 98.3—*Policies Regarding the Conduct of Five-Year ("Sunset") Reviews of Antidumping and Countervailing Duty Orders: Policy Bulletin*, 63 FR 18871 (April 16, 1998).

Initiation of Review

In accordance with 19 CFR 351.218(c), we are initiating the Sunset Review of the following antidumping duty orders:

DOC case No.	ITC case No.	Country	Product	Department contact
A-475-059	AA1921-167	Italy	Pressure Sensitive Plastic Tape (3rd Review).	Brandon Farlander, (202) 482-0182.
A-570-884	731-TA-1034	PRC	Color Television Receivers	Hallie Zink, (202) 482-6907.

Filing Information

As a courtesy, we are making information related to Sunset proceedings, including copies of the pertinent statute and Department's regulations, the Department schedule for Sunset Reviews, a listing of past revocations and continuations, and current service lists, available to the public on the Department's sunset Internet Web site at the following address: "<http://ia.ita.doc.gov/sunset/>." All submissions in these Sunset Reviews must be filed in accordance with the Department's regulations regarding format, translation, service, and certification of documents. These rules can be found at 19 CFR 351.303.

Pursuant to 19 CFR 351.103(d), the Department will maintain and make available a service list for these proceedings. To facilitate the timely preparation of the service list(s), it is requested that those seeking recognition as interested parties to a proceeding contact the Department in writing within 10 days of the publication of the Notice of Initiation.

Because deadlines in Sunset Reviews can be very short, we urge interested parties to apply for access to proprietary information under administrative protective order ("APO") immediately following publication in the **Federal Register** of this notice of initiation by filing a notice of intent to participate. The Department's regulations on submission of proprietary information and eligibility to receive access to business proprietary information under APO can be found at 19 CFR 351.304-306.

Information Required From Interested Parties

Domestic interested parties defined in section 771(9)(C), (D), (E), (F), and (G) of the Act and 19 CFR 351.102(b) wishing to participate in a Sunset Review must respond not later than 15 days after the date of publication in the **Federal Register** of this notice of initiation by filing a notice of intent to participate. The required contents of the notice of intent to participate are set forth at 19 CFR 351.218(d)(1)(ii). In accordance with the Department's regulations, if we do not receive a notice of intent to participate from at least one domestic interested party by the 15-day deadline, the Department will automatically revoke the order without further review. See 19 CFR 351.218(d)(1)(iii).

If we receive an order-specific notice of intent to participate from a domestic interested party, the Department's regulations provide that all parties wishing to participate in the Sunset Review must file complete substantive responses not later than 30 days after the date of publication in the **Federal Register** of this notice of initiation. The required contents of a substantive response, on an order-specific basis, are set forth at 19 CFR 351.218(d)(3). Note that certain information requirements differ for respondent and domestic parties. Also, note that the Department's information requirements are distinct from the Commission's information requirements. Please consult the Department's regulations for information regarding the Department's conduct of Sunset Reviews.¹ Please

¹ In comments made on the interim final sunset regulations, a number of parties stated that the proposed five-day period for rebuttals to substantive responses to a notice of initiation was insufficient. This requirement was retained in the

consult the Department's regulations at 19 CFR Part 351 for definitions of terms and for other general information concerning antidumping and countervailing duty proceedings at the Department.

This notice of initiation is being published in accordance with section 751(c) of the Act and 19 CFR 351.218(c).

Dated: April 24, 2009.

John M. Andersen,

Acting Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations.

BILLING CODE 3510-DS-P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

Science Advisory Board

AGENCY: Office of Oceanic and Atmospheric Research (OAR), National Oceanic and Atmospheric Administration (NOAA), Department of Commerce (DOC).

ACTION: Notice of public meeting.

SUMMARY: This notice sets forth the schedule and proposed agenda of a forthcoming meeting of the NOAA Science Advisory Board. The members will discuss and provide advice on issues outlined in the agenda below.

DATES: The meeting is scheduled for: Monday, May 18, 2009, 10:30-11:30 a.m. Eastern Daylight Time.

final sunset regulations at 19 CFR 351.218(d)(4). As provided in 19 CFR 351.302(b), however, the Department will consider individual requests to extend that five-day deadline based upon a showing of good cause.
