SUPPLEMENTARY INFORMATION: FERC is requesting comments on the record retention requirement FERC-915,¹ "Public Utility Market-Based Rate Authorization Holders—Records Retention Requirement," OMB Control No. 1902-0223.

In accordance with the Federal Power Act, the Department of Energy Organization Act (DOE Act), and the Energy Policy Act of 2005 (EPAct 2005), the Commission regulates the transmission and wholesale sales of electricity in interstate commerce, monitors and investigates energy markets, uses civil penalties and other means against energy organizations and individuals who violate FERC rules in the energy markets, and administers accounting and financial reporting regulations and oversees conduct of regulated companies.

The Commission imposes the FERC-915 record retention requirement, in 18 CFR 35.41(d), on applicable sellers to

¹ The FERC-915 requirements (formerly labeled "FERC-915(516)") are contained in 18 CFR 35.41(d).

retain, for a period of five years, all data and information upon which they bill the prices charged for "electric energy or electric energy products it sold pursuant to Seller's market-based rate tariff, and the prices it reported for use in price indices."

The record retention period of five years is necessary due to the importance of records related to any investigation of

possible wrongdoing and related to assuring compliance with the codes of conduct and the integrity of the market. The requirement is necessary to ensure consistency with the rule prohibiting market manipulation (adopted in Order No. 670) and the generally applicable five-year statute of limitations where the Commission seeks civil penalties for violations of the anti-manipulation rules

or other rules, regulations, or orders to which the price data may be relevant.

Action: FERC is requesting a three-year extension of the current expiration date for the FERC-915,¹ with no changes to the requirements.

Burden Statement: Public reporting burden for this collection is estimated at:

FERC requirements	Number of respondents annually	Number of responses per respondent	Average burden hours per response	Total annual burden hours
	(1)	(2)	(3)	(1)×(2)×(3)
FERC-915	1,150	1	1	1,150

The estimated total annual cost to respondents includes hours for labor (1,150 hrs. at \$17 per hour, for a labor cost of \$19,550) and storage costs (using an estimated 65,000 cu. ft of records in off-site storage, for a total storage cost of \$419,858). The total annual cost (labor plus off-site storage) is \$439,408; the total annual cost per respondent is \$382.

The reporting burden includes the total time, effort, or financial resources expended to generate, maintain, retain, disclose, or provide the information including: (1) Reviewing instructions; (2) developing, acquiring, installing, and utilizing technology and systems for the purposes of collecting, validating, verifying, processing, maintaining, disclosing and providing information; (3) adjusting the existing ways to comply with any previously applicable instructions and requirements; (4) training personnel to respond to a collection of information; (5) searching data sources; (6) completing and reviewing the collection of information; and (7) transmitting, or otherwise disclosing the information.

The estimate of cost for respondents is based upon salaries for professional and clerical support, as well as direct and indirect overhead costs. Direct costs include all costs directly attributable to providing this information, such as administrative costs and the cost for information technology. Indirect or overhead costs are costs incurred by an organization in support of its mission. These costs apply to activities which benefit the whole organization rather than any one particular function or activity.

Comments are invited on: (1) Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information will have practical utility; (2) the accuracy of the agency's estimate of the burden of

the proposed collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on those who are to respond, including the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Kimberly D. Bose,
Secretary.
