

band base station antennas is approximately 1,100 hours.

The hourly wage for the testing and recordkeeping required to conduct the testing and maintain records required by the regulations is about \$54.88 (average total compensation for management, professional, and related for all workers, goods-producing industries, Bureau of Labor Statistics, September 2008, for an estimated annual cost to the industry of \$60,400.

The Commission staff will expend approximately 40 hours reviewing records required to be maintained for omnidirectional citizens band base station antennas. The annual cost to the Federal government of the collection of information in these regulations is estimated to be \$3,200.

C. Request for Comments

The Commission solicits written comments from all interested persons about the proposed collection of information. The Commission specifically solicits information relevant to the following topics:

- Whether the collection of information described above is necessary for the proper performance of the Commission's functions, including whether the information would have practical utility;
- Whether the estimated burden of the proposed collection of information is accurate;
- Whether the quality, utility, and clarity of the information to be collected could be enhanced; and
- Whether the burden imposed by the collection of information could be minimized by use of automated, electronic or other technological collection techniques, or other forms of information technology.

Dated: June 30, 2009.

Todd A. Stevenson,

Secretary, Consumer Product Safety Commission.

BILLING CODE 6355-01-P

CONSUMER PRODUCT SAFETY COMMISSION

Proposed Extension of Approval of Information Collection; Comment Request—Electrically Operated Toys and Children's Articles

AGENCY: Consumer Product Safety Commission.

ACTION: Notice.

SUMMARY: As required by the Paperwork Reduction Act (44 U.S.C. Chapter 35), the Consumer Product Safety

Commission (CPSC or Commission) requests comments on a proposed extension of approval of a collection of information from manufacturers and importers of certain electrically operated toys and children's articles. The collection of information consists of testing and recordkeeping requirements in regulations entitled "Requirements for Electrically Operated Toys or Other Electrically Operated Articles Intended for Use by Children," codified at 16 CFR Part 1505.

The Commission will consider all comments received in response to this notice before requesting an extension of this collection of information from the Office of Management and Budget (OMB).

DATES: The Office of the Secretary must receive written comments not later than September 8, 2009.

ADDRESSES: Written comments should be captioned "Electrically Operated Toys" and sent by e-mail to cpsc-os@cpsc.gov. Comments may also be sent by facsimile to (301) 504-0127, or by mail to the Office of the Secretary, Consumer Product Safety Commission, 4330 East-West Highway, Bethesda, Maryland 20814. cpsc-os@cpsc.gov.

FOR FURTHER INFORMATION CONTACT: For information about the proposed collection of information call or write Linda Glatz, Division of Policy and Planning, Office of Information Technology and Technology Services, Consumer Product Safety Commission, 4330 East-West Highway, Bethesda, MD 20814; telephone: (301) 504-7671 or by e-mail to lglatz@cpsc.gov.

SUPPLEMENTARY INFORMATION: In 1973, the Commission issued safety requirements for electrically operated toys and children's articles to protect children from unreasonable risks of injury from electric shock, electrical burns, and thermal burns. These regulations are codified at 16 CFR Part 1505 and were issued under the authority of sections 2 and 3 of the Federal Hazardous Substances Act (15 U.S.C. 1261, 1262).

A. Requirements for Electrically Operated Toys

These regulations are applicable to toys, games, and other articles intended for use by children that are powered by electrical current from a nominal 120 volt circuit. Video games and articles designed primarily for use by adults that may be incidentally used by children are not subject to these regulations.

The regulations prescribe design, construction, performance, and labeling requirements for electrically operated toys and children's articles. The

regulations also require manufacturers and importers of those products to develop and maintain a quality assurance program. Additionally, section 1505.4(a)(3) of the regulations requires those firms to maintain records for three years containing information about: (1) The material and production specifications and the description of the quality assurance program required by 16 CFR 1505.4(a)(2); (2) the results of all inspections and tests conducted; and (3) records of sales and distribution.

OMB approved the collection of information requirements in the regulations under control number 3041-0035. OMB's most recent extension of approval expires on September 30, 2009. The Commission now proposes to request an extension of approval for the information collection requirements in the regulations.

The safety need for this collection of information remains. Specifically, if a manufacturer or importer distributes products that violate the requirements of the regulations, the records required by section 1505.4(a)(3) can be used by the firm and the Commission to: (i) Identify specific lots or production lines of products which fail to comply with applicable requirements; and (ii) notify distributors and retailers in the event the products are subject to recall.

B. Estimated Burden

The Commission staff estimates that about 40 firms are subject to the testing and recordkeeping requirements of the regulations. Each one may have an average of ten products each year for which testing and recordkeeping would be required, resulting in approximately 400 records. The Commission staff estimates that the tests required by the regulations can be performed on one product in 16 hours and that recordkeeping can be performed for one product in four hours. Thus, the estimated testing burden hours are 6,400 (16 hours × 400) and the estimated recordkeeping burden hours are 1,600 hours (400 records × 4 hours).

The Commission staff estimates that each firm may spend 30 minutes or less per model on the labeling requirements. Assuming each firm produces 10 new models each year, the estimated labeling burden hours are 200 hours (40 firms × 10 models per firm × 0.5 hours per model = 200 hours) per year. The estimated total burden hours for recordkeeping and labeling are 1,800 hours for all firms (1,600 hours for recordkeeping + 200 hours for labeling).

The CPSC staff estimates that the hourly wage for the time required to perform the required testing and recordkeeping is approximately \$54.88

(Bureau of Labor Statistics, All workers, goods-producing industries, management, professional and related September 2008), and the hourly wage for the time required to maintain the labeling requirements is approximately \$27.14 (Bureau of Labor Statistics, All workers, goods-producing industries, sales and office September 2008). The annualized total cost to the industry is estimated to be \$400,084 ($6,400 \times \$54.88 + 1,800 \times \27.14).

The Commission staff will expend less than one staff month reviewing records required to be maintained for electrically operated toys and children's articles. The annual cost to the Federal government of the collection of information in these regulations is estimated to be less than \$13,839.

C. Request for Comments

The Commission solicits written comments from all interested persons about the proposed collection of information. The Commission specifically solicits information relevant to the following topics:

- Whether the collection of information described above is necessary for the proper performance of the Commission's functions, including whether the information would have practical utility;
- Whether the estimated burden of the proposed collection of information is accurate;
- Whether the quality, utility, and clarity of the information to be collected could be enhanced; and
- Whether the burden imposed by the collection of information could be minimized by use of automated, electronic or other technological collection techniques, or other forms of information technology.

Dated: June 30, 2009.

Todd A. Stevenson,

Secretary, Consumer Product Safety Commission.

CONSUMER PRODUCT SAFETY COMMISSION

Proposed Extension of Approval of Information Collection; Comment Request—Safety Standard for Cigarette Lighters

AGENCY: Consumer Product Safety Commission.

ACTION: Notice.

SUMMARY: As required by the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), the Consumer Product

Safety Commission (CPSC or Commission) requests comments on a proposed request for an extension of approval of a collection of information from manufacturers and importers of disposable and novelty cigarette lighters. This collection of information consists of testing and recordkeeping requirements in certification regulations implementing the Safety Standard for Cigarette Lighters (16 CFR Part 1210). The Commission will consider all comments received in response to this notice before requesting an extension of approval of this collection of information from the Office of Management and Budget (OMB).

DATES: The Office of the Secretary must receive written comments not later than September 8, 2009.

ADDRESSES: Written comments should be captioned "Cigarette Lighters" and e-mailed to the Office of the Secretary at cpsc-os@cpsc.gov. Comments may also be sent by facsimile to (301) 504-0127, or by mail to the Office of the Secretary, Consumer Product Safety Commission, 4330 East-West Highway, Bethesda, Maryland 20814.

FOR FURTHER INFORMATION CONTACT: For information about the proposed collection of information call or write Linda Glatz, Division of Policy and Planning, Office of Information Technology and Technology Services, Consumer Product Safety Commission, 4330 East-West Highway, Bethesda, MD 20814; telephone: (301) 504-7671 or by e-mail to lglatz@cpsc.gov.

SUPPLEMENTARY INFORMATION: In 1993, the Commission issued the Safety Standard for Cigarette Lighters (16 CFR Part 1210) under provisions of the Consumer Product Safety Act (CPSA) (15 U.S.C. 2051 *et seq.*) to eliminate or reduce risks of death and burn injury from fires accidentally started by children playing with cigarette lighters. The standard contains performance requirements for disposable and novelty lighters that are intended to make cigarette lighters subject to the standard resist operation by children younger than five years of age.

A. Certification Requirements

Section 14(a) of the CPSA (15 U.S.C. 2063(a)) requires manufacturers, importers, and private labelers of a consumer product subject to a consumer product safety standard under the CPSA or similar rule, ban, standard, or regulation under any other act enforced by the Commission to issue a certificate stating that the product complies with all applicable rules, bans, standards or regulations. Section 14(a) of the CPSA also requires that the certificate of

compliance must be based on a test of each product or upon a reasonable testing program and specify each such rule, ban, standard or regulation applicable to the product.

Section 14(b) of the CPSA (15 U.S.C. 2063(b)) authorizes the Commission to issue regulations to prescribe a reasonable testing program to support certificates of compliance with a consumer product safety standard under the CPSA or similar rule, ban, standard, or regulation under any other act enforced by the Commission. Section 16(b) of the CPSA (15 U.S.C. 2065(b)) authorizes the Commission to issue rules to require that firms "establish and maintain" records to permit the Commission to determine compliance with rules issued under the authority of the CPSA.

The Commission has issued regulations prescribing requirements for a reasonable testing program to support certificates of compliance with the standard for cigarette lighters. These regulations require manufacturers and importers to submit a description of each model of lighter, results of surrogate qualification tests for compliance with the standard, and other information before the introduction of each model of lighter in commerce. These regulations also require manufacturers, importers, and private labelers of disposable and novelty lighters to establish and maintain records to demonstrate successful completion of all required tests to support the certificates of compliance that they issue. 16 CFR Part 1210, Subpart B.

The Commission uses the information compiled and maintained by manufacturers, importers, and private labelers of disposable and novelty lighters to protect consumers from risks of accidental deaths and burn injuries associated with those lighters. More specifically, the Commission uses this information to determine whether lighters comply with the standard by resisting operation by young children. The Commission also uses this information to obtain corrective actions if disposable or novelty lighters fail to comply with the standard in a manner that creates a substantial risk of injury to the public.

OMB approved the collection of information in the certification regulations for cigarette lighters under control number 3041-0116. OMB's most recent extension of approval will expire on September 30, 2009. The Commission proposes to request an extension of approval for this collection of information requirements.
