d. *Applicant:* South Feather Water and Power Agency.

e. *Name of Project:* South Feather Power Project.

f. *Location:* The South Feather Power Project is located on the South Fork Feather River, Lost Creek, and Slate Creek in Butte, Plumas, and Yuba Counties, California. This project occupies federal and non-federal lands.

g. *Filed Pursuant to:* Federal Power Act, 16 U.S.C. 791a-825r.

h. *Applicant Contact:* Kathy Zancanella, South Feather Water and Power Agency Power Division, 2310 Oro Quincy Highway, Oroville, CA 95966, Tel: (503) 534-1221.

j. *Deadline for Filing Comments, Motions To Intervene, and Protests:* September 28, 2009.

All documents (original and eight copies) should be filed with: Secretary, Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426.

The Commission's Rules of Practice and Procedure require all interveners filing documents with the Commission to serve a copy of that document on each person whose name appears on the official service list for the project. Further, if an intervenor files comments or documents with the Commission relating to the merits of an issue that may affect the responsibilities of a particular resource agency, they must also serve a copy of the document on that resource agency. A copy of any motion to intervene must also be served upon each representative of the Applicant specified in the particular application.

k. *Description of Request:* South Feather Water and Power Agency has filed an Environmental Report addressing its intent to modify the crest of Sly Creek Dam, part of the South Feather Power Project (FERC No. 2088). The project consists of four separate developments: Sly Creek, Woodleaf, Forbestown and Kelly Ridge. The proposed work at Sly Creek Dam would take place within the Sly Creek development. Water from Sly Creek reservoir is controlled by Sly Creek Dam, which releases water to the Lost Creek reservoir downstream of the dam. A hydraulic study on Sly Creek reservoir included an estimate of the probable maximum flood (PMF) flow

event for the reservoir, which indicated that during a PMF event, the dam crest would overtop unless it was raised and/or the spillway was modified. To ensure the licensee's compliance with FERC engineering guidelines and safety regulations, modifications to the dam are necessary. The licensee is proposing to raise the dam crest, replace the spillway gate and platform, raise the abutment walls of the spillway channel, and improve the roadway approaching the spillway and associated drainage structures. Under the licensee's proposal, the operating level of Sly Creek reservoir's water surface elevation would remain consistent with the original water surface elevation approved in the project license.

The Commission intends to prepare an environmental document under the National Environmental Policy Act (NEPA) for the Sly Creek Dam crest raise project. The NEPA document will be used by the Commission to identify environmental impacts and to identify measures that would help mitigate the impacts caused by modification activities.

l. *Locations of the Application:* A copy of the application is available for inspection and reproduction at the Commission's Public Reference Room, located at 888 First Street, NE., Room 2A, Washington, DC 20426.
