Participants will hear directly from FDA experts and representatives of global regulatory authorities and take home best practices for compliance. The conference will span 2 1/2 days and cover current issues affecting the industry, including the following issues:

- Pharmaceutical safety and good manufacturing practices,
- Continual improvement,
- Technology transfer,
- Supply chain,
- Combination products,

- Recall root causes,
- Knowledge management,
- Good distribution practices and good importer practices, and
- Process validation and quality risk management.

The conference program will include PDA Interest Group sessions as well as an exhibition on September 14 and 15.

Immediately following the conference, on September 17 and 18, the PDA Training and Research Institute (PDA TRI) is offering courses to complement conference sessions.

FDA has made continuing education of the biologics, drug, and device manufacturing community a high priority to help ensure the quality of FDA-regulated pharmaceuticals and devices. The workshop helps to achieve objectives set forth in section 406 of the FDA Modernization Act of 1997 (21 U.S.C. 393), which include working closely with stakeholders and maximizing the availability and clarity of information to stakeholders and the public. The workshop also is consistent with the Small Business Regulatory Enforcement Fairness Act of 1996 (Public Law 104-121), as outreach activities by Government agencies to small businesses.
