National Park Service

Notice of Inventory Completion: New York University College of Dentistry, New York, NY

AGENCY: National Park Service, Interior.

ACTION: Notice.

Notice is here given in accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), 25 U.S.C. 3003, of the completion of an inventory of human remains in the possession of New York University College of Dentistry, New York, NY. The human remains were removed from an unknown location or locations.

This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA, 25 U.S.C. 3003 (d)(3). The determinations in this notice are the sole responsibility of the museum, institution, or Federal agency that has control of the Native American human remains. The National Park Service is not responsible for the determinations in this notice.

A detailed assessment of the human remains was made by New York University College of Dentistry professional staff in consultation with representatives of the Comanche Nation, Oklahoma.

At an unknown date, human remains representing a minimum of two individuals were removed from an unknown location or locations. At an unknown date, Dr. Joseph Jones of Louisiana added the human remains to his collection. In 1906, the widow of Dr. Jones sold his collection to the Museum of the American Indian, Heye Foundation. In 1956, the human remains were transferred to Dr. Theodore Kazamiroff, New York University College of Dentistry. No known individuals were identified. No associated funerary objects are present.

The original records of Dr. Jones identify the human remains as Comanche, but do not list a locality for them. Museum records also identify the human remains as "Comanche." The attribution of a tribal affiliation of Comanche in the museum records suggests that the human remains may date to the historic period. Forensic data corroborate the tribal attribution and

estimated age for the individuals. One cranium has cutmarks that appear to have been made near the time of death by a metal knife. The other cranium shows evidence of cradleboarding, which was practiced by the Comanche in the historic period. Both sets of remains exhibit weathering that would be expected for the rock or scaffold burial locations that were preferred by the Comanche during the historic period. During consultation, the tribal representative for the Comanche Nation supported the identification of the human remains as Comanche.

Officials of New York University College of Dentistry have determined that, pursuant to 25 U.S.C. 3001 (9-10), the human remains described above represent the physical remains of two individuals of Native American ancestry. Officials of New York University College of Dentistry also have determined that, pursuant to 25 U.S.C. 3001 (2), there is a relationship of shared group identity that can be reasonably traced between the Native American human remains and the Comanche Nation, Oklahoma.

Representatives of any other Indian tribe that believes itself to be culturally affiliated with the human remains should contact Dr. Louis Terracio, New York University College of Dentistry, 345 East 24th St., New York, NY 10010, telephone (212) 998-9917, before October 23, 2009. Repatriation of the human remains to the Comanche Nation, Oklahoma may proceed after that date if no additional claimants come forward.

The New York University College of Dentistry is responsible for notifying the Comanche Nation, Oklahoma, that this notice has been published.

Dated: September 2, 2009

Manager, National NAGPRA Program.

DEPARTMENT OF JUSTICE

Notice of Lodging of Consent Decree Under the Comprehensive Environmental Response, Compensation, and Liability Act

Consistent with Section 122(d) of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, as amended ("CERCLA"), 42 U.S.C. 9622(d), and 28 CFR 50.7, notice is hereby given that on September 17, 2009, the United States lodged a Consent Decree with the South Tahoe Public Utility District ("the District") in *United States of America v. El Dorado County, California, et al.*, Civil No. S-01-1520 MCE GGH (E.D. Cal.), with respect to the Meyers Landfill Site, located in Meyers, El Dorado County, California (the "Site").

El Dorado County, California filed a Third Party Complaint for contribution against a number of third parties, including the District. The District asserted CERCLA claims against the United States Department of Agriculture, Forest Service ("Forest Service") as well as non-CERCLA claims related to a Forest Service Special Use Permit for a portion of their sewer line. The proposed Consent Decree resolves the District's CERCLA claims against the Forest Service and the Forest Service's potential CERCLA claims against the District.

In addition, attached to the proposed Consent Decree is a separate, related, Settlement Agreement resolving the non-CERCLA claims between the Forest Service and the District. The Settlement Agreement's effectiveness is conditioned on the Court's entry of the proposed Consent Decree. Under the proposed Consent Decree the District is not paying any money towards the Forest Service's past costs, but it has agreed to provide access to its sewer line and to cooperate and to provide its expertise in implementing the OU-1 Remedy. In addition, the District will dismiss its CERCLA claims against the Forest Service. The District will receive from the United States a covenant not to sue or to take administrative action pursuant to Sections 106 or 107 of CERCLA, 42 U.S.C. 9606 and 9607, as amended, for the United States' past and future response costs at the Site.

The Department of Justice will receive for a period of thirty (30) days from the date of this publication comments relating to the Consent Decree. Comments should be addressed to the Acting Assistant Attorney General, Environment and Natural Resources Division, and either e-mailed to pubcomment-ees.enrd@usdoj.gov
