[Project No. 2146-111]

#### Alabama Power Company; Notice of Availability of Final Environmental Assessment

December 31, 2009.

In accordance with the National Environmental Policy Act of 1969 and the Federal Energy Regulatory Commission's (Commission) regulations, 18 CFR part 380 (Order No. 486, 52 FR 47897), the Office of Energy Projects has reviewed the application for a new major license for the Coosa River Hydroelectric Project (Coosa River Project), which includes the Weiss, H. Neely Henry, Logan Martin, Lay, and Bouldin developments; the Mitchell Hydroelectric Project (P-82); and the Jordan Hydroelectric Project (P-618).

Alabama Power Company has requested that Project Nos. 2146, 82, and 618 be consolidated into one project. We are processing these three projects under Project No. 2146-111. This final environmental assessment (EA) is a cooperative undertaking between the U.S. Army Corps of Engineers and the Commission.

The Coosa River Project is located on the Coosa River, in the States of Alabama and Georgia. The Logan Martin development affects less than 1 acre of Federal lands, the Lay development affects 133.5 acres of Federal lands, the Mitchell Project affects 127.3 acres of Federal lands, and the Jordan Project affects 10.1 acres of Federal lands. Staff has prepared a final EA for the project.

The final EA contains staff's analysis of the potential environmental effects of the project and concludes that licensing the project, with appropriate environmental protective measures, would not constitute a major Federal action that would significantly affect the quality of the human environment.

A copy of the final EA is available for review at the Commission in the Public Reference Room or may be viewed on the Commission's Web site at <http://www.ferc.gov> using the "eLibrary" link.
