SUMMARY: In accordance with the Federal Advisory Committee Act, Public Law 92–463, as amended, the National Aeronautics and Space Administration announces a meeting of the Aeronautics Committee of the NASA Advisory Council. The meeting will be held for the purpose of soliciting from the aeronautics community and other persons research and technical information relevant to program planning.

DATES: Tuesday, February 16, 2010, 12 p.m. to 5 p.m.; Wednesday, February 17, 2010, 9 a.m. to 3 p.m.

ADDRESSES: NASA Headquarters, 300 E Street, SW., Washington, DC, Room 6B42.

FOR FURTHER INFORMATION CONTACT: Ms. Susan L. Minor, Executive Secretary for the Aeronautics Committee, National Aeronautics and Space Administration Headquarters, Washington, DC 20546, (202) 358–0566, or

susan.l.minor@nasa.gov.

SUPPLEMENTARY INFORMATION: The meeting will be open to the public up to the capacity of the room. The agenda for the meeting includes the following topics:

• NASA Aeronautics Overview Briefing, including partnership strategy.

• Future Directions for NASA Aeronautics.

• Aeronautics Committee 2010 Work Plan discussion.

It is imperative that these meetings be held on this date to accommodate the scheduling priorities of the key participants. Attendees will be requested to comply with NASA security requirements, including the presentation of a valid picture ID, before receiving an access badge. Foreign nationals attending this meeting will be required to provide a copy of their passport, visa, or green card in addition to providing the following information no less than 10 working days prior to the meeting: full name; gender; date/ place of birth; citizenship; visa/green card information (number, type, expiration date); passport information (number, country, expiration date); employer/affiliation information (name of institution, address, country, phone); and title/position of attendee. To expedite admittance, attendees with U.S. citizenship can provide identifying information 3 working days in advance by contacting Ms. Susan L. Minor via email at susan.l.minor@nasa.gov or by telephone at (202) 358-0566. Persons with disabilities who require assistance should indicate this.

Dated: January 22, 2010. **P. Diane Rausch,**

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50-338 and 50-339; NRC-2010-0026]

Virginia Electric and Power Company; North Anna Power Station, Unit Nos. 1 and 2; Environmental Assessment and Finding of No Significant Impact

The U.S. Nuclear Regulatory Commission (NRC) is considering issuance of an exemption, pursuant to Section 73.5, "Specific exemptions," of Title 10 of the Code of Federal Regulations (10 CFR) part 73, "Physical protection of plants and materials," from the implementation date for certain requirements of 10 CFR part 73 for Facility Operating License Nos. NPF-4 and NPF–7, issued to Virginia Electric and Power Company, (the licensee), for operation of the North Anna Power Station, Unit Nos. 1 and 2 (NAPS). In accordance with 10 CFR 51.21, "Criteria for and identification of licensing and regulatory actions requiring environmental assessments," the NRC prepared an environmental assessment documenting its finding. The NRC concluded that the proposed actions will have no significant environmental impact.

Environmental Assessment

Identification of the Proposed Action

The proposed action would exempt the NAPS from the required implementation date of March 31, 2010, for several new requirements of 10 CFR part 73. Specifically, NAPS would be granted an exemption from being in full compliance with certain new requirements contained in Section 73.55, "Requirements for physical protection of licensed activities in nuclear power reactors against radiological sabotage," of 10 CFR part 73 by the March 31, 2010, deadline, Power Reactor Security Requirements, 74 FR 13926, 13935 (March 27, 2009). Instead, the licensee has proposed an alternate full compliance implementation date of August 31, 2010, approximately five months beyond the date required by 10 CFR part 73. The proposed action, an extension of the schedule for completion of certain actions required by the revised 10 CFR part 73, does not involve any physical changes to the reactor, fuel, plant structures, support structures, water, or land at the NAPS site that were not previously considered in the environmental assessment and finding of no significant impact made by the Commission in promulgating its revision to 10 CFR part 73, 74 FR 13967.

The proposed action is in accordance with the licensee's application dated November 23, 2009.

The Need for the Proposed Action

The proposed action is needed to provide the licensee with additional time to perform the required upgrades to the NAPS security system due to resource and logistical impacts of vendor availability.

Environmental Impacts of the Proposed Action

The NRC has completed its environmental assessment of the proposed exemption. The staff has concluded that the proposed action to extend the implementation deadline would not significantly affect plant safety and would not have a significant adverse effect on the probability of an accident occurring.

The proposed action would not result in an increased radiological hazard beyond those previously analyzed in the environmental assessment and finding of no significant impact made by the Commission in promulgating its revisions to 10 CFR part 73, 74 FR 13967. There will be no change to radioactive effluents that effect radiation exposures to plant workers and members of the public. Therefore, no changes or different types of radiological impacts are expected as a result of the proposed exemption.

The proposed action does not result in changes to land use or water use, or result in changes to the quality or quantity of non-radiological effluents. No changes to the National Pollution Discharge Elimination System permit are needed. No effects on the aquatic or terrestrial habitat in the vicinity of the plant, or to threatened, endangered, or protected species under the Endangered Species Act, or impacts to essential fish habitat covered by the Magnuson-Steven's Act are expected. There are no impacts to the air or ambient air quality.

There are no impacts to historical and cultural resources. There would be no impact to socioeconomic resources. Therefore, no changes to or different types of non-radiological environmental impacts are expected as a result of the proposed exemption.

Accordingly, the NRC concludes that there are no significant environmental impacts associated with the proposed action. In addition, in promulgating its revisions to 10 CFR part 73, the Commission prepared an environmental assessment and published a finding of no significant impact [Part 73, Power Reactor Security Requirements, 74 FR 13926, 13967 (March 27, 2009)].
