

effectiveness? What should the threshold be for entry of a technology into the DOE portfolio? Does every technology deserve a program? Conversely, when should we declare "mission accomplished" for a government RD&D effort, or cease efforts on a program whose costs may outweigh its benefits? How can DOE be more effective at each stage of the innovation chain? Are technology targets (e.g., cost or deployment targets) useful markers to orient and structure DOE activities?

E. Private Sector Partnership. What are the optimal roles for the private sector, government laboratories, and academia in accelerating technology innovation? How can DOE best coordinate activities between and among these types of organizations (including the wide variety of institutions within each class)? How should we gauge the effectiveness of this coordination? How can the basic-applied coupling be optimized? Are there examples in other sectors or other countries that can serve as models? Are "technology user facilities" analogous to the Department's scientific user facilities possible, or even desirable? If so, what would be the most effective model for their operation? How can the Department best gather technology market information? How can information on private sector innovation be captured without compromising competitive advantage?

F. Technology Demonstration. What are best practices in performing large-scale demonstration projects? How close to commercial viability does a demonstration have to be? What are the optimal cost sharing arrangements? How might demonstrations be coordinated with DOE financing activities? How can demonstration projects better benefit all stakeholders beyond the immediate participants? How are lessons-learned best captured and promoted, and how is intellectual property best handled? How should DOE determine the number of demonstrations needed to address technical and operation risks? How do we think about failure in the demonstration phase?

G. Non-Technical Barriers. A number of non-technical barriers—including Federal, state, and local regulations, market failures, and non-technical risks—impact the rate of deployment of energy technologies. What, if any, role should the Department have in addressing these barriers?

H. Technologies and Resources. The framing document published in association with this announcement describes each of the six strategies just mentioned in greater detail, and highlights several technologies that

could contribute to success in each strategy. For each technology or set of technologies, the framing document provides a non-exclusive list of resources that we intend to draw upon as we develop the DOE-QTR. Among these resources are: The America's Energy Future reports from the National Academies of Science (<http://sites.nationalacademies.org/Energy/index.htm>); historical data from the Energy Information Administration (<http://www.eia.gov>); the European Commission on Energy's *Investing in the Development of Low Carbon Technologies: Strategic Energy Technology Plan* (http://ec.europa.eu/energy/technology/set_plan/set_plan_en.htm); technology-specific DOE and interagency studies and reports listed in the relevant technology sections of the framing document; and the International Institute for Applied Systems Analysis's *Global Energy Assessment* (http://www.iiasa.ac.at/Research/ENE/GEA/index_gea.html), when it becomes available. Other resources are listed in the framing document, associated with each technology. We welcome comment on the selection of these technologies and sources, as well as suggestions on alternate sources. We also welcome updated technology, cost, and forecast data, particularly in rapidly-developing fields.

The Department also welcomes comment on the format and tone of the framing document as well as identification of any factual errors or omissions of relevant facts and data.

Public Participation Policy

It is the policy of the Department to ensure that public participation is an integral and effective part of DOE activities, and that decisions are made with the benefit of significant public input and perspectives.

The Department recognizes the many benefits to be derived from public participation for both stakeholders and DOE. Public participation provides a means for DOE to gather a diverse collection of opinions, perspectives, and values from the broadest spectrum of the public, enabling the Department to make more informed decisions. Public participation benefits stakeholders by creating an opportunity to provide input on decisions that affect their communities and our nation. In keeping with the President's commitment to transparency in government, DOE will post online at <http://energy.gov/QTR> all submissions received from external parties in response to this request for comment. In addition, DOE will discuss this framing document and the

submissions received from external parties with advisory committees, workshops, and expert discussion groups.

Issued in Washington, DC, on March 9, 2011.

Under Secretary for Science, Department of Energy.

Comment Date: 5 p.m. Eastern Time on Monday, March 14, 2011.

Any person desiring to intervene or to protest in any of the above proceedings must file in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214) on or before 5 p.m. Eastern time on the specified comment date. It is not necessary to separately intervene again in a subdocket related to a compliance filing if you have previously intervened in the same docket. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Anyone filing a motion to intervene or protest must serve a copy of that document on the Applicant. In reference to filings initiating a new proceeding, interventions or protests submitted on or before the comment deadline need

not be served on persons other than the Applicant.

As it relates to any qualifying facility filings, the notices of self-certification [or self-recertification] listed above, do not institute a proceeding regarding qualifying facility status. A notice of self-certification [or self-recertification] simply provides notification that the entity making the filing has determined the facility named in the notice meets the applicable criteria to be a qualifying facility. Intervention and/or protest do not lie in dockets that are qualifying facility self-certifications or self-recertifications. Any person seeking to challenge such qualifying facility status may do so by filing a motion pursuant to 18 CFR 292.207(d)(iii). Intervention and protests may be filed in response to notices of qualifying facility dockets other than self-certifications and self-recertifications.

The Commission encourages electronic submission of protests and interventions in lieu of paper, using the FERC Online links at <http://www.ferc.gov>. To facilitate electronic service, persons with Internet access who will eFile a document and/or be listed as a contact for an intervenor must create and validate an eRegistration account using the eRegistration link. Select the eFiling link to log on and submit the intervention or protests.

Persons unable to file electronically should submit an original and 14 copies of the intervention or protest to the Federal Energy Regulatory Commission, 888 First St. NE., Washington, DC 20426.

The filings in the above proceedings are accessible in the Commission's eLibrary system by clicking on the appropriate link in the above list. They are also available for review in the Commission's Public Reference Room in Washington, DC. There is an

eSubscription link on the Web site that enables subscribers to receive e-mail notification when a document is added to a subscribed docket(s). For assistance with any FERC Online service, please e-mail FERCOnlineSupport@ferc.gov. or call (866) 208-3676 (toll free). For TTY, call (202) 502-8659.

[Docket Nos. PR10-14-002; PR11-92-000]

Enterprise Texas Pipeline LLC; Notice of Compliance Filing

Take notice that on March 1, 2011, Enterprise Texas Pipeline LLC (Enterprise Texas) filed a revised Statement of Rates to its Statement of Operating Conditions implementing the settled rates and a Refund Report pursuant to its September 23, 2010, Settlement Agreement approved by a December 16, 2010, Letter Order.

Any person desiring to participate in this rate filing must file in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a notice of intervention or motion to intervene, as appropriate. Such notices, motions, or protests must be filed on or before the date as indicated below. Anyone filing an intervention or protest must serve a

copy of that document on the Applicant. Anyone filing an intervention or protest on or before the intervention or protest date need not serve motions to intervene or protests on persons other than the Applicant.

The Commission encourages electronic submission of protests and interventions in lieu of paper using the "eFiling" link at <http://www.ferc.gov>. Persons unable to file electronically should submit an original and 7 copies of the protest or intervention to the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426.

This filing is accessible on-line at <http://www.ferc.gov>, using the "eLibrary" link and is available for review in the Commission's Public Reference Room in Washington, DC.
