SUPPLEMENTARY INFORMATION: The Gulf of Mexico, South Atlantic, and Caribbean Fishery Management Councils, in conjunction with NOAA Fisheries and the Atlantic and Gulf States Marine Fisheries Commissions have implemented the Southeast Data, Assessment and Review (SEDAR) process, a multi-step method for determining the status of fish stocks in the Southeast Region. SEDAR includes three workshops: (1) Data Workshop, (2) Stock Assessment Workshop and (3) Review Workshop. The product of the Data Workshop is a data report which compiles and evaluates potential datasets and recommends which datasets are appropriate for assessment analyses. The product of the Stock Assessment Workshop is a stock assessment report which describes the fisheries, evaluates the status of the

stock, estimates biological benchmarks, projects future population conditions, and recommends research and monitoring needs. The assessment is independently peer reviewed at the Review Workshop. The product of the Review Workshop is a Consensus Summary documenting Panel opinions regarding the strengths and weaknesses of the stock assessment and input data. Participants for SEDAR Workshops are appointed by the Gulf of Mexico, South Atlantic, and Caribbean Fishery Management Councils and NOAA Fisheries Southeast Regional Office and Southeast Fisheries Science Center. Participants include data collectors and database managers; stock assessment scientists, biologists, and researchers; constituency representatives including fishermen, environmentalists, and NGO's; International experts; and staff of Councils, Commissions, and state and federal agencies.

SEDAR 30 Workshop Schedule:

July 17–19, 2012; SEDAR 30 Data Scoping Workshops

July 17–19, 2012: 3 p.m.–7 p.m.

An assessment data set and associated documentation will be developed during the Data Scoping Workshops. Participants will evaluate available data and select appropriate sources for providing information on life history characteristics, catch statistics, discard

estimates, length and age composition, and fishery dependent and fishery independent measures of stock abundance.

October 16–18, 2012, 2011; SEDAR 30 Assessment Workshop

October 16–18, 2012: 9 a.m.–8 p.m.

Using datasets provided by the Data Scoping Workshops, participants will develop population models to evaluate stock status, estimate population benchmarks and stock status criteria, and project future conditions. Participants will recommend the most appropriate methods and configurations for determining stock status and estimating population parameters. Participants will prepare a workshop report, compare and contrast various assessment approaches, and determine whether the assessments are adequate for submission to the review panel.

February 4–7, 2013; SEDAR 30 Review Workshop

February 4, 2013: 1 p.m.–8 p.m.;
 February 5–7, 2013: 8 a.m.–8 p.m.

The Review Workshop is an independent peer review of the assessment developed during the Data and Assessment Workshops. Workshop Panelists will review the assessment and document their comments and recommendations in a Consensus Summary.

The established times may be adjusted as necessary to accommodate the timely completion of discussion relevant to the assessment process. Such adjustments may result in the meeting being extended from, or completed prior to the time established by this notice.

Special Accommodations

These meetings are physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to the Council office (see **ADDRESSES**) at least 10 business days prior to each workshop.

SUPPLEMENTARY INFORMATION: The subject amendment to Permit No. 15748 is requested under the authority of the Marine Mammal Protection Act of 1972, as amended (16 U.S.C. 1361 *et seq.*), and the regulations governing the taking and importing of marine mammals (50 CFR part 216).

Permit No. 15748, issued on May 25, 2011 (76 FR 31942), authorizes the permit holder to capture and harass free-living Weddell seals (*Leptonychotes weddellii*) in McMurdo Sound and along the shore of Ross Island, Antarctica to study thermoregulation. The research involves capture and restraint of adult females and pups/juveniles of either sex for attachment of scientific instruments, morphometric measurements, ultrasound, and tissue sampling. Harassment of additional seals in the vicinity of captured animals is also authorized, as is research-related mortality. Tissue samples collected may be exported from Antarctica for analysis in the U.S. The permit is valid through August 30, 2015.

The permit holder is requesting the permit be amended to include changes to the terms and conditions of the permit related to numbers of animals taken and manner of taking to include: increasing takes for the deployment of instrumentation on weaned pups/juveniles from 20 over the life of the permit to 35 over the life of the permit; increasing the number of takes per animal of weaned pups/juveniles and adult females from 2 to 3; adding nasal, oral, and rectal swab collection (one of each per animal) in weaned pups/juveniles and adult females; adding the use of spray lidocaine or similar agent; adding stable isotope analysis to compare stable isotope values of Weddell seals in the Ross Sea in the early 1900s to today; and adding an influenza A analysis using the requested swab collection to understand the

exposure of pathogens to Antarctic marine mammals.

In compliance with the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*), an initial determination has been made that the activity proposed is categorically excluded from the requirement to prepare an environmental assessment or environmental impact statement.

Concurrent with the publication of this notice in the **Federal Register**, NMFS is forwarding copies of this application to the Marine Mammal Commission and its Committee of Scientific Advisors.

Dated: May 1, 2012.
