

3.0 fluid ounces, and uses hand-held non-refillable aerosol containers?

A: No. EPA does not consider RMR to be affected by 40 CFR part 63, subpart HHHHHH because the definition of "spray-applied coating operations" excludes coatings applied from a hand-held device with a paint cup capacity that is equal to or less than 3.0 fluid ounces, according to 40 CFR section 63.11180.

Q: Which tanks are subject to 40 CFR part 63, subpart EEEE at the Great Plains Synfuels Plant located in Beulah, North Dakota operated by Dakota Gasification Company (DGC), if tar oil produced at the facility is sold such that it no longer meets the exclusion to the definition of "organic liquid", according to 40 CFR section 63.2406 for onsite fuels?

A: EPA has determined that tanks in the distribution area where the tar oil is shipped would be subject to the 40 CFR part 63, subpart EEEE. EPA was unable to determine whether tanks and separators upstream of the distribution area, which produces tar oil, are subject to the 40 CFR part 63, subpart EEEE without additional information (e.g., tank identification, process flow diagrams), as described in the EPA response letter.

Q1: Does EPA concur with the Minnesota Pollution Control Agency that Children's Health Care's physical changes will result in derating the boilers in accordance with 40 CFR part 60, subpart Dc?

A1: Yes. EPA provides concurrence that the derate method proposed for the boilers is acceptable, because it will consist of a permanent physical change that cannot be easily undone and prevents boilers from operating at a capacity greater than the derated value, and would require a reduction of their capacity.

Q2: Does EPA concur with the Minnesota Pollution Control Agency that the derated boilers will not be subject to 40 CFR part 60, subpart Dc?

A2: Yes. EPA provides concurrence that the derated boilers will not be subject to 40 CFR part 60, subpart Db if the proposed procedures specified in the EPA response letter are followed, including demonstration of the maximum heat input capacity by operating the boiler at maximum capacity for a 24-hour period.

Q: Does EPA approve adopting 40 CFR part 75 quality assurance (QA) test schedules and grace periods as opposed

to current schedule requirements for Cylinder Gas Audits (CGAs) and Relative Test Accuracy Audits (RATAs) under 40 CFR part 60, Appendix F for the NO_x, CO, and O₂ Continuous Emission Monitoring Systems (CEMS) at Mystic Station in Charlestown, MA?

A: Yes. EPA approves Mystic Station's request to omit a NO_x, CO, and O₂ CGA during any calendar quarter in which the unit is operated less than 168 unit operating hours. EPA also approves Mystic's request to conduct a RATA once every four QA operating quarters. Regardless of operation, Mystic Station shall conduct a CGA for NO_x, CO, and O₂ at least once every four calendar quarters as well as a RATA at least once every eight calendar quarters. EPA also allows Mystic to follow the grace period provisions of 40 CFR part 75, Appendix B, section 2.2.4 for CGAs and 40 CFR part 75, Appendix B, section 2.3.3 for RATAs.

Q1: Does EPA approve a plan for Veterans Affairs, Edith Nourse Rogers Memorial Hospital in Bedford, Massachusetts (VA Bedford) to track monthly natural gas and oil usage for its three dual-fuel boilers, as opposed to daily records of fuel consumption under 40 CFR section 60.48c(g)(1)?

A1: Yes. EPA approves a decrease in fuel usage recordkeeping from daily records to monthly records for VA Bedford's three boilers conditioned on VA Bedford's use of natural gas as the primary fuel and distillate oil with sulfur content no greater than 0.5 percent.

Q2: May VA Bedford submit annual reports for its three dual-fueled boilers as opposed to semiannual reports required under 40 CFR section 60.48c(j)?

A2: No. EPA does not approve a decrease in the reporting frequency under 40 CFR part 60, subpart Dc because the facility received four shipments of diesel fuel in 2007, and two shipments of diesel fuel in 2009. Therefore, because more than one shipment was received in each of those recent years, VA Bedford must continue to submit the required semiannual reports.

Q1: Does EPA approve an alternative monitoring plan for a Cumene Depropanizer Off Gas Vent Stream subject to 40 CFR part 60, subpart J at the Citgo Corpus Christi East Refinery located in Corpus Christi, Texas?

A1: No. EPA finds that the alternative monitoring plan from March 24, 2006, is no longer valid since an exemption

provided in the rule applies to the stream. The Cumene Depropanizer Off Gas is a fuel gas that meets the exemption requirement of 40 CFR section 60.105(a)(4)(iv)(C). Therefore, the fuel gas combustion device does not need to meet the monitoring requirements of either 40 CFR section 60.105(a)(3) or 40 CFR section 60.105(a)(4).

Abstract for [1100012]

Q1: Does EPA approve an alternative monitoring request for Hydrar Process Unit Vent Streams subject to 40 CFR part 60, subpart J for the Citgo Corpus Christi East Refinery located in Corpus Christi, Texas?

A1: No. EPA does not approve the alternative monitoring request since the specified Hydrar vent stream fuels are fuel gases that meet the exemption requirement of 40 CFR section 60.105(a)(4)(iv)(C). Therefore, the fuel gas combustion device does not need to meet the monitoring requirements of either 40 CFR section 60.105(a)(3) or 40 CFR section 60.105(a)(4) for these specified vent streams.
