

use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.

FOR FURTHER INFORMATION CONTACT: Jay Robinson, DHS/NPPD/IP/SOPD, jay.robinson@hq.dhs.gov.

SUPPLEMENTARY INFORMATION: To assist SOPD in identifying and assessing the vulnerabilities and risks pertaining to the critical infrastructures, owner-operators and/or security managers often volunteer to conduct an automated self risk assessment. The requested questionnaire information is necessary to facilitate electronic execution of SOPD's risk assessment to focus protection resources and activities on those assets, systems, networks, and functions with the highest risk profiles. Currently, there is no known data collection that includes multiple critical nodes with sector-specific related criteria. When the user logs into the system, the user will be prompted with the assessment questionnaire. Once the user begins the assessment, the only information required to be submitted to (and shared with) DHS before completing the assessment is venue identification information (e.g., contact information, address, latitude/longitude, venue type, or capacity). A user can elect to share the entire completed assessment with DHS. The assessment information is protected as Protected Critical Infrastructure Information. The information from the assessment will be used to assess the risk to the evaluated entity (e.g., calculate a vulnerability score by threat, evaluate protective/mitigation measures relative to vulnerability, calculate a risk score, or report threats presenting highest risks). The information will also be combined with data from other respondents to provide an overall sector perspective (e.g., report additional relevant protective/mitigation measures for consideration).
