

under FIFRA (7 U.S.C. 136) for pesticide registration, pursuant to 40 CFR part 158. Test guideline studies may also be useful for satisfying FIFRA data requirements either in data call-ins issued pursuant to FIFRA section 3(c)(2)(B) or as needed to satisfy data requirements appropriate for specific pesticide registration applications, or for satisfying data requirements to demonstrate the safety of a tolerance or tolerance exemption under FDCA section 408 (21 U.S.C. 346a).

Test guidelines used in regulatory actions as the basis for test standards under TSCA (15 U.S.C. 2601) are typically promulgated in 40 CFR part 799. They may also be written into specific TSCA rules such as TSCA section 4 test rules or consent orders or they may be used as recommended test guidelines as part of voluntary testing. Note that where data will be required under a TSCA rule, such as a test rule under TSCA section 4, a TSCA-specific version of the applicable test guideline may be promulgated as a rule. Examples of specific chemical test rules and consent orders may be found in 40 CFR part 799, subparts B and C.

The availability of public draft test guidelines for public comment was announced in a March 4, 1996 **Federal Register** notice. The public draft test guidelines were placed in the EPA Docket for public access. These public draft test guidelines were also submitted by EPA to FIFRA SAP on May 29, 1996, for peer review and was announced in a May 1, 1996 **Federal Register** notice. These final test guidelines incorporate changes recommended by FIFRA SAP and other changes resulting from the public comments received in response to the 1996 public draft test guidelines. The majority of comments and changes dealt with the organizational structure of the test guideline groups, consistency of organization and format across the ecological effects guidelines, addition of tables summarizing test conditions, addition of tables summarizing test validity elements, consistency in use of terminology, and updating of references. The reporting section of each test guideline now provides a list of study specific information to include in a study report based on study reporting requirements specified in 40 CFR 160.185 for FIFRA and 40 CFR 792.185 for TSCA.
