The criteria for the evaluation will be as follows:

Programmatic (45%)

Are all of the six project tasks discussed adequately? Is there a clear statement of how each task will be accomplished, the strategies to be employed, required staffing, and other required resources? Has the applicant demonstrated a clear understanding of ITIP and curriculum design concepts? Are there any innovative approaches, techniques, or design aspects proposed that will enhance the project?

Organizational (30%)

Does the proposed project staff possess the skills, knowledge and expertise necessary to complete the tasks listed under the scope of work? Does the applicant organization, group, or individual have the organizational capacity to achieve all five project tasks? Are the proposed project management and staffing plans realistic and sufficient to complete the project within the project time frame?

Project Management/Administration (25%)

Does the applicant identify reasonable milestones and measures to track progress? If consultants and/or partnerships are proposed, is there a reasonable justification for their inclusion in the project and a clear structure to ensure effective coordination? Is the proposed budget realistic, does it provide a sufficient cost detail/narrative, and does it represent good value relative to the anticipated results?

Note: NIC will NOT award a cooperative agreement to an applicant who does not have a Dun and Bradstreet Database Universal Number (DUNS) and is not registered in the Central Contractor Registry (CCR).

A DUNS number can be received at no cost by calling the dedicated toll-free DUNS number request line at 1-800-333-0505 (if you are a sole proprietor, you would dial 1-866-705-5711 and select option #1).

SUPPLEMENTARY INFORMATION: The Hazardous Waste Operations and Emergency Response (HAZWOPER) Standard specifies a number of information collection requirements. Employers can use the information collected under the HAZWOPER rule to develop the various programs the Standard requires and to ensure that workers are trained properly about the safety and health hazards associated with hazardous waste operations and emergency response to hazardous waste releases. The OSHA uses the records developed in response to this Standard to determine adequate compliance with the Standard's safety and health provisions. An employer's failure to collect and distribute the information required in this Standard would significantly affect OSHA efforts to control and reduce injuries and fatalities. Such failure would also be contrary to the direction Congress provided in the Superfund Amendments and Reauthorization Act.

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless it is approved by the OMB under the PRA and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information if the collection of information does not display a valid Control Number. See 5 CFR 1320.5(a) and 1320.6. The DOL obtains OMB approval for this information collection under Control Number 1218-0202. The current approval is scheduled to expire on June 30, 2012; however, it should be noted that existing information collection requirements submitted to the OMB receive a month-to-month extension while they undergo review. For additional information, see the related notice published in the **Federal Register** on April 30, 2012 (77 FR 25500).

Interested parties are encouraged to send timely comments to the OMB, Office of Information and Regulatory Affairs at the address shown in the **ADDRESSES** section of this notice. In order to help ensure appropriate consideration, comments should mention OMB Control Number 1218-0202. The OMB is particularly interested in comments that:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.
