

toxicity. When *in vivo* testing is necessary, a sequential testing strategy is recommended to reduce the number of test animals. The method of testing the dermal corrosivity and primary irritation of substances referred to in §§ 1500.3(c)(3) and (4), respectively, is a patch-test technique on the abraded and intact skin of the albino rabbit, clipped free of hair. * * *

5. Amend section 1500.42 by adding introductory text, adding a sentence at the beginning of paragraph (a)(1), and revising paragraph (c) to read as follows:

§ 1500.42 Test for eye irritants.

Guidelines for *in vivo* and *in vitro* testing of ocular irritation of substances, including testing that does not require animals, are presented in the CPSC's animal testing policy set forth in 16 CFR 1500.232. A weight-of-evidence analysis is recommended to evaluate existing information before *in vivo* tests are considered. This analysis should include any of the following: Existing human and animal data on ocular or dermal irritation, structure activity relationships, physicochemical properties, and chemical reactivity. When *in vivo* testing is necessary, a sequential testing strategy is recommended to reduce the number of test animals. Additionally, the routine use of topical anesthetics, systemic analgesics, and humane endpoints to avoid or minimize pain and distress in ocular safety testing is recommended.

(a)(1) In the method of testing the ocular irritation of a substance referred to in § 1500.3(c)(4), six albino rabbits are used for each test substance * * *

(c) To assist testing laboratories and others interested in interpreting ocular irritation test results, the CPSC animal testing policy Web page at <http://www.cpsc.gov/businfo/animaltesting.html> will contain the scoring system defined in the U.S. EPA's Test Guideline, OPPTS 870.2400: Acute Eye Irritation³ or the OECD Test Guideline 405: Acute Eye Irritation/Corrosion.⁴

SUPPLEMENTARY INFORMATION: In Notice No. 127, published in the **Federal Register** on April 30, 2012, at 77 FR 25382, the Alcohol and Tobacco Tax and Trade Bureau (TTB) proposes to amend its regulations concerning the standards of identity for distilled spirits at 27 CFR 5.22 to include "Cachaça" as a type of rum and as a distinctive product of Brazil. TTB undertook this rulemaking action in response to a petition from the Government of Brazil, and in response to an agreement between the United States and Brazil setting out a procedure that could lead each party to recognize certain distinctive distilled spirits produced in the other party's territory. The agreement provides in part that if, following the publication of a notice of proposed rulemaking, the United States publishes a final rule that lists Cachaça as a type of rum distinctive to Brazil, then Brazil, within 30 days thereafter, will recognize Bourbon Whiskey and Tennessee Whiskey as distinctive products of the United States.

The 60-day comment period for Notice No. 127 originally was set to close on June 29, 2012. On June 15, 2012, TTB received a comment from the European Union requesting an extension of the comment period "in order to have time to analyze and prepare comments" on the proposal (see Comment 4 within Docket No. TTB-2012-0002). In response to this request, TTB is extending the comment period for an additional 10 days, and, therefore, comments on Notice No. 127 are now due on or before July 9, 2012.

POSTAL SERVICE**39 CFR Part 111****New Pallet Preparation Standards for Periodicals****AGENCY:** Postal Service™.**ACTION:** Proposed rule.

SUMMARY: The Postal Service is proposing to revise the *Mailing Standards of the United States Postal Service*, Domestic Mail Manual (DMM®), to align pallet preparation standards for Periodicals with those currently required for Periodicals prepared in sacks and similar containers.

FOR FURTHER INFORMATION CONTACT: Craig Vance at 202-268-7595, or Kevin Gunther at 202-268-7208.

SUPPLEMENTARY INFORMATION: Prior to January 22, 2012, mailers were required to prepare bundles of flat-size Periodicals in mixed area distribution center (ADC) sacks (or similar containers), labeled according to labeling list L009; and in origin mixed ADC (OMX) sacks (or similar

containers), labeled according to labeling list L201. These standards assured that the OMX and the mixed ADC separations were always made, and the sacks that were prepared could then be presented directly for acceptance or placed on pallets in accordance with DMM 705.8.10.2.

The separation of mail destined within the "OMX" surface reach of the mailer's plant (or entry point) from the remaining mixed ADC mail is crucial for maintaining acceptable service performance, for the benefit of both Periodicals customers and USPS® processing operations.

On January 22, 2012, the Postal Service revised DMM 705.8.10.2 to allow mailers to place bundles of flat-size Periodicals directly onto mixed area distribution center (ADC) and origin mixed ADC (OMX) pallets, but retained the existing language describing these pallet levels as optional. The long-standing language that required the mixed ADC pallet to be labeled in accordance with labeling list L004 was also retained. As a result of this change, some mailers have discontinued the practice of making the mixed ADC and OMX separations when placing bundles of flat-size Periodicals directly on pallets.

It was not the intent of the January 22, 2012 revision to eliminate the requirement to perform the OMX and mixed ADC separations. The Postal Service therefore proposes to revise DMM 705.8.10.2 to provide the option for mailers to prepare both the OMX and mixed ADC pallet at no minimum volume threshold. The Postal Service proposes to require the preparation of both pallets at volumes of 100 pounds or more, and require sacking of these separations if the mailer elects not to form either pallet level below the 100-pound threshold. The Postal Service also proposes that the mixed ADC pallet will be prepared in accordance with labeling list L009 instead of L004, as is currently required. If these new standards are adopted, they will be effective January 28, 2013.

Although these changes are intended to be effective January 28, 2013, to provide for the most expeditious processing of their mixed ADC and OMX Periodicals mailpieces in USPS® networks, mailers are strongly encouraged to begin using these new standards immediately.

Although the Postal Service is exempted by 39 U.S.C. 410(a) from the notice and comment requirements of the Administrative Procedure Act (5 U.S.C 553(b), (c)), we invite public comments on the following proposed revisions to *Mailing Standards of the United States*
