Discharges of dewatering effluents from reserve pits are also prohibited. Produced water discharges are prohibited, except from wells in the Stripper Subcategory located east of the 98th meridian whose produced water comes from the Carrizo/Wilcox, Reklaw or Bartosh formations in Texas as authorized by the previous permit. Discharges of produced waters from new stripper wells to an impaired waterbody that is impaired for dissolved oxygen are prohibited. The discharge of deck drainage, formation test fluids, sanitary waste, domestic waste and miscellaneous discharges is authorized. More stringent requirements are established to regulate discharges to water quality-impaired waterbodies. Pursuant to section 316(b) of the Clean Water Act (CWA), requirements for new facilities are also established in the final permit. Major changes also include definition of "operator", acute toxicity test for produced water, spill prevention best management practices, and electronic reporting requirements. To obtain discharge authorization, operators of such facilities must submit a new Notice of Intent (NOI). To determine whether your facility, company, business, organization, etc. is regulated by this action, you should carefully examine the applicability criteria in Part I, Section A.1 of this permit.

*Other Legal Requirements:* State certification under section 401 of the CWA; consistency with the Texas Coastal Management Program; and compliance with National Environmental Policy Act, Endangered Species Act, Magnuson-Stevens Fishery Conservation and Management Act, Historic Preservation Act, Paperwork Reduction Act, and Regulatory Flexibility Act requirements are discussed in the Region's responses to comments.

## SUPPLEMENTARY INFORMATION:

### I. Additional Information About the Proposed Consent Decree

The proposed settlement agreement would settle Plaintiff's claims in a title V deadline suit concerning a petition to object to a permit issued by the Louisiana Department of Environmental Quality for the Noranda alumina processing facility. The proposed settlement agreement would require EPA to sign its response to Plaintiff's petition by December 15, 2012. Once EPA grants or denies the petition, EPA would be required to expeditiously deliver notice of its response to Plaintiff. Under the settlement agreement, once EPA has met these obligations, Plaintiff shall file a motion for voluntary dismissal, with prejudice.

For a period of thirty (30) days following the date of publication of this notice, the Agency will receive written comments relating to the proposed settlement agreement from persons who were not named as parties or intervenors to the litigation in question. EPA or the Department of Justice may withdraw or withhold consent to the proposed settlement agreement if the comments disclose facts or considerations that indicate that such consent is inappropriate, improper, inadequate, or inconsistent with the requirements of the Act. Unless EPA or the Department of Justice determines that consent to the settlement agreement should be withdrawn, the terms of the agreement will be affirmed.
