

(BCU), support equipment, spare and repair parts, personnel training and training equipment, publications and technical data, U.S. Government and contractor technical assistance and other related logistics support. The estimated cost is \$88 million.

This proposed sale will contribute to the foreign policy and national security of the United States by helping to improve the security of a NATO ally who continues to be an important force for the political stability and economic progress in Northern Europe.

The Belgium Army intends to use the Javelin system as part of its overall military modernization program. The Javelin system will replace the Belgian Army's existing MILAN missile system.

The proposed sale of the missiles and support will not alter the basic military balance in the region.

The principal contractors will be Joint Javelin Venture (JJV), a consortium of Raytheon, in Tucson, Arizona and Lockheed Martin, in Orlando, Florida. There are no known offset agreements proposed in connection with this potential sale.

Implementation of this proposed sale will require 6 U.S. Government or contractor representatives to travel to Belgium for a period of 2 weeks for equipment training.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Transmittal No. 12-52

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act

Annex

Item No. vii

(vii) *Sensitivity of Technology:*

1. The Javelin Weapon System's hardware and the documentation provided are unclassified. However, sensitive technology is contained within the system itself. The sensitivity is primarily in the software programs that instruct the system how to operate in the presence of countermeasures.

Programs are contained in the system in the form of microprocessors with Read Only Memory (ROM) maps, which do not provide the software program itself. The overall hardware is considered sensitive in that the modulation frequency and infrared wavelengths could be used in countermeasure development. The benefits to be derived from the sale, as outlined in the policy justification of this notification, outweigh the potential damage that could result if technology were to be revealed to unauthorized persons.

2. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements, the information could be used to develop countermeasures that might reduce weapon system effectiveness or

be used in the development of a system with similar or advanced capabilities.

POLICY JUSTIFICATION

Brazil—Assault Amphibious Vehicles

The Government of Brazil has requested the possible sale of 26 Assault Amphibious Vehicles (AAVs)/Reliability, Availability and Maintainability/Rebuild to Standard (RAM/RS), with ancillary equipment, and machine guns. Also included are the upgrade of Brazil's existing AAVs to the RAM/RS configuration, weapons and ammunition, spare and repair parts, support equipment, tools and test equipment, technical data and publications, personnel training and training equipment, U.S. Government and contractor engineering, technical, and logistics support services, and other related elements of logistics support. The estimated cost is \$233 million.

The proposed sale will contribute to foreign policies and national security of the United States by helping to improve the security of Brazil which has been, and continues to be, an important force for political stability and economic progress in South America.

Brazil will use this equipment to augment its current inventory of amphibious vehicles and to modernize and strengthen its Naval operational amphibious capability in support of national defense objectives. Brazil will have no difficulty absorbing these vehicles into its armed forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The AAVs will be procured through a competitive procurement. There are no

known offset agreements proposed in connection with this potential sale.

Implementation of this proposed sale will not require the assignment of any additional U.S. Government or contractor representatives to Brazil. There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.
