An emergency clearance is being requested for information needed to improve patient care through specific mechanisms. VA has undertaken an initiative to implement a patient-centered medical home model, "Patient Aligned Care Team" or PACT at all Veterans Health Administration (VHA) Ambulatory Primary Care sites. This initiative supports the VHA's Universal Health Care Services Plan to redesign VHA healthcare delivery through increasing access, coordination, communication, and continuity of care. The patient experiences from this data collection are intended to help form future national VA policy.

OMB Control Number: 2900—New.

Type of Review: New data collection.

Abstract: The data collected on VA Form 10-0536 will be used to implement a patient-centered medical home at all Veterans Health Administration Ambulatory Primary Care sites. The medical home provides accessible, coordinated, comprehensive, patient-centered care, and is managed by primary care providers with the active involvement of other clinical and non-clinical staff. The medical home allows patients to have a more active role in their health care and is associated with increased quality improvement, patient satisfaction, and a decrease in hospital costs due to fewer hospital visits and readmissions. The information collected will be used by the VAAHS PACT Demonstration Laboratory and the Ambulatory Care Service to evaluate the universal VHA

PACT Systems Redesign, document patient experiences over time, and improve patient care through specific mechanisms.
