

**POLICY JUSTIFICATION***Iraq—Air Traffic Control and Landing System*

The Government of Iraq has requested a proposed sale of commercially available Federal Aviation Administration Air Traffic Control and Landing System/Navigational Aids. The system will include an ASR-11 Radar, Autotrac II simulator, Instrument Landing System, and Airfield Lighting System, spare and repair parts, support equipment, personnel training and training equipment, publications and technical documentation, site survey, installation, U.S. Government and contractor engineering and logistics support services, and other related elements of logistics and program support. The estimated cost is \$60 million.

This proposed sale will contribute to the foreign policy and national security of the United States by helping to improve the security of a friendly country.

The proposed sale will contribute to Iraq's continued efforts toward rebuilding their airfield systems at Tikrit Air Base for near-term basing of multiple aircraft. The renovations and upgrades to the airfield and its systems will allow for greater ease in launch and recovery of aircraft and will benefit the overall sustainment of aircraft and affiliated systems over time. This equipment aids Iraq's continuing reconstruction effort that directly improves Iraq's ability to control its own airspace.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The prime contractor is unknown and will be selected through competitive process. There are no known offset agreements proposed in connection with this potential sale.

Implementation of this proposed sale will not require the assignment of any additional U.S. Government or contractor representatives to Iraq.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

**SUPPLEMENTARY INFORMATION:****A. Purpose**

In accordance with 31 U.S.C. 7701(c), a contractor doing business with a Government agency is required to furnish its Tax Identification Number (TIN) to that agency. 31 U.S.C. 3325(d) requires the Government to include, with each certified voucher prepared by the Government payment office and submitted to a disbursing official, the TIN of the contractor receiving payment under the voucher. 26 U.S.C. 6050M, as implemented in the Department of Treasury, Internal Revenue Service (IRS) regulations at Title 26 of the Code of Federal Regulations (CFR), requires heads of Federal executive agencies to report certain information to the IRS. 26 U.S.C. 6041 and 6041A, as implemented in 26 CFR, in part, requires payors, including Government agencies, to report to the IRS, on form 1099, payments made to certain contractors.

To comply with the requirements of 31 U.S.C. 7701(c) and 3325(d), reporting requirements of 26 U.S.C. 6041, 6041A, and 6050M, and implementing regulations issued by the IRS in 26 CFR, FAR clause 52.204-3, Taxpayer Identification, requires a potential Government contractor to submit, among other information, its TIN. The TIN may be used by the Government to collect and report on any delinquent amounts arising out of the contractor's relationship with the Government. A contractor is not required to provide its TIN on each contract in accordance with FAR clause 52.204-3, Taxpayer Identification, when FAR clause 52.204-7, Central Contractor

Registration, is inserted in contracts. FAR clause 52.204-7 requires a potential Federal contractor to provide its TIN in the Central Contractor Registration (CCR) system.

### B. Annual Reporting Burden

The annual reporting burden decreased from what was published in the **Federal Register** at 73 FR 20613, on April 16, 2008. The decrease is attributed to a revised estimate of the respondents and hours per response. A potential federal contractor is required to complete a one-time registration in CCR to provide basic information in order to be awarded a Federal Government contract. Part of a potential Federal contractor's CCR registration includes providing its TIN in accordance with FAR 52.204-7. It is estimated that a significant number of Federal contractors will not be required to submit their TIN under this collection at FAR 52.204-3, due to the requirement to submit their TIN during the registration process. Based on Federal procurement Data Systems (FPDS) data, 193,397 unique contractors were awarded Federal Government contracts in Fiscal Year 2011 (FY11). We estimate that fifteen percent of the FY11 unique vendors, responding on average to three solicitations per year, are required to provide their TIN in accordance with FAR 52.204-3. In addition, based on the TIN being readily available business information within contractor's system, the estimated hours per response is decreased to .10. The revised estimate of the annual reporting burden requirements is reflected below.

*Respondents:* 29,010.

*Responses per Respondent:* 3.

*Total Responses:* 87,030.

*Hours per Response:* .10.

*Total Burden Hours:* 8,703.

### SUPPLEMENTARY INFORMATION:

#### A. Purpose

The objective of a contractor purchasing system review (CPSR), as discussed in Part 44 of the FAR, is to evaluate the efficiency and effectiveness with which the contractor spends Government funds and complies with Government policy when subcontracting. The review provides the administrative contracting officer a basis for granting, withholding, or withdrawing approval of the contractor's purchasing system.

#### B. Annual Reporting Burden

There is no single data collection process or system, e.g., Federal Procurement Data System (FPDS), that identifies the number of CPSRs conducted governmentwide. To date no public comments or questions have been received regarding the burden estimates included in the currently approved clearance. However, for purposes of this clearance, the estimated Average Burden Per Response is estimated at 25 hours per completion. Based on coordination with a Government agency that conducts CPSRs, the estimate has been adjusted upwards from the current 17 hours to 25 hours, in order to provide a more accurate accounting of the contractors' time necessary for reading information and preparing for a CSPR.

*Number of Respondents:* 1,580.

*Responses per Respondent:* 1.

*Total Responses:* 1,580.

*Average Burden per Response:* 25.

*Total Burden Hours:* 39,500.
