SUPPLEMENTARY INFORMATION:

Title: 30 CFR 250, Subpart B, Plans and Information.

OMB Control Number: 1014-NEW.

Abstract: The Outer Continental Shelf (OCS) Lands Act, as amended (43 U.S.C. 1331 *et seq.*, and 43 U.S.C. 1801 *et seq.*), authorizes the Secretary of the Interior to prescribe rules and regulations necessary for the administration of the leasing provisions of that Act related to mineral resources on the OCS. Such rules and regulations will apply to all operations conducted under a lease, right-of-use and easement, or unit.

The Independent Offices Appropriations Act (31 U.S.C. 9701), the Omnibus Appropriations Bill (Pub. L. 104-133, 110 Stat. 1321, April 26, 1996), and OMB Circular A-25, authorize Federal agencies to recover the full cost of services that confer special benefits. Under the Department of the Interior's implementing policy, BSEE is required to charge fees for services that provide special benefits or privileges to an identifiable non-Federal recipient above and beyond those which accrue to the public at large. Deepwater Operations Plans are subject to cost recovery, and BSEE regulations specify a service fee for this request.

Regulations implementing these responsibilities are under 30 CFR Part 250, Subpart B, and are among those delegated to BSEE. This request also covers the related Notices to Lessees and Operators (NTLs) that BSEE issues

to clarify, supplement, or provide additional guidance on some aspects of our regulations.

To accommodate the split of regulations from the Bureau of Ocean Energy Management, Regulation and Enforcement to BSEE (76 FR 64432), BSEE is requesting OMB approval of the already approved information collections that were previously under 1010-0151 to reflect BSEE's new 1014 numbering system. This ICR does not change the burden hours or make any other modifications to what was previously approved, other than to remove the collections under the purview of BOEM.

Responses are mandatory. No questions of a sensitive nature are asked. BSSE will protect information considered proprietary under the Freedom of Information Act (5 U.S.C. 552) and its implementing regulations (43 CFR part 2); also under regulations at 30 CFR 250.197, *Data and information to be made available to the public or for limited inspection*, and 30 CFR part 252, *Outer Continental Shelf (OCS) Oil and Gas Information Program*.

BSEE analyzes and evaluates the information and data collected under this subpart to ensure that planned operations are safe; will not adversely affect the marine, coastal, or human environment; and will conserve the resources of the OCS. We use the information to make an informed decision on whether to approve the proposed deepwater operations plans, or whether modifications are necessary without the analysis and evaluation of the required information.

Frequency: On occasion.

Description of Respondents: Potential respondents comprise Federal oil, gas, or sulphur lessees and/or operators.

Estimated Reporting and Recordkeeping Hour Burden: The estimated annual hour burden for this information collection is a total of 18,256 hours. The following chart details the individual components and estimated hour burdens. In calculating the burdens, we assumed that respondents perform certain requirements in the normal course of their activities. We consider these to be usual and customary and took that into account in estimating the burden.
