This Notice also lists the following information:

Title of Proposal: Data Collection for Full Housing Choice Voucher Program Administrative Fee Study.

Description of the need for the information and proposed use: This request is for the clearance of on-site and telephone data collection from public housing agencies (PHAs) in support of the Housing Choice Voucher (HCV) Program Administrative Fee Study. The purpose of the study is to collect accurate information on the costs of administering the HCV program across a national sample of high-performing and efficient PHAs, and to use this information to develop a new administrative fee allocation formula for the HCV program. This request for clearance is the fourth OMB request in support of this study and is for data collection for the full national study. The prior OMB requests have covered the reconnaissance or research design phase of the study, pretesting the full national study design, and conducting additional reconnaissance visits to increase the study sample. For the current OMB request, the research team proposes three main types of data collection: (1) Measuring the time that HCV staff spend working on the various activities required to administer the program over a two-month period; (2) collecting information via interviews and document review on overhead costs, other costs related to HCV program administration that cannot be captured by measuring staff time, and "transaction counts" (the number of times an HCV program activity is completed over a specified period of time) in order to translate the staff time spent on that activity into a time per activity or cost per activity; and (3) a telephone survey of 130 small HCV programs (fewer than 250 vouchers) to understand how smaller agencies administer the HCV program effectively without the benefit of economies of scale that apply to larger programs. The results of the data collection will be used to generate estimates of total cost per activity per PHA and to build a multivariate regression model that tests

how much the variation across PHAs in administrative costs can be explained by PHA, participant, and market characteristics. The results of the model will be used to inform the development of an administrative fee formula that is based on the average cost per activity and takes into account the most important factors that cause some HCV programs to be more costly to administer than others.

OMB Approval Number: Pending.

Agency form numbers: None.

Members of Affected Public: An average of 25 PHA staff per site at up to 60 PHAs and an average of 2 PHA staff per site at up to 130 PHAs, for a total of 1,760 PHA staff persons across 190 PHAs.

Estimation of the total number of hours needed to prepare the information collection including number of respondents, frequency of response, and hours of response: The research team plans to collect time measurement and cost data at up to 60 PHAs across the country and to survey an additional 130 PHAs with small HCV programs. There are four data collection activities that involve PHA staff. First, up to 3 staff at each of the 60 PHAs will spend a total of 1,440 hours assembling overhead cost data and preparing for the site visit (3 staff \times 8 hours \times 60 sites = 1,440 hours). Second, up to 3 staff at each of the 60 PHAs will spend up to 2 days each being interviewed in person or by telephone by the study team about program overhead costs, transaction counts, and recent changes in voucher program operations (3 staff \times 16 hours \times 60 sites = 2,880 hours). Third, an average of 20 HCV program staff per site will participate in the time measurement data collection. This will entail receiving 2 hours of training (20 staff \times 2 hours \times 60 sites = 2,400 hours) and responding to notifications via a smart phone provided by the study team on their work activities over a two-month period (40 working days). Responding to the notifications will take approximately 15 minutes per day per staff, for a total of 10 hours per staff over the 40 working days (20 staff \times 10 hours \times 60 sites = 12,000 hours). Finally, up to 2 PHA staff at 130 PHAs will participate in the small program telephone survey. These staff will spend up to 2 hours preparing for the telephone survey, including assembling financial statements and other documentation, and an average of 45 minutes completing the survey (2 staff \times 2.75 hours \times 130 PHAs = 715 hours). The total estimated burden across all proposed data collection activities is 19,435 hours.

Status of the proposed information collection: Pending OMB approval.

Authority: Section 3506 of the Paperwork Reduction Act of 1995, 44 U.S.C. Chapter 35, as amended.

Dated: January 30, 2012.

Erika Poethig,

Deputy Assistant Secretary for Policy Development and Research.
