ICR Numbers: EPA ICR Number 0659.12, OMB Control Number 2060-0108.

Abstract

The affected entities are subject to the General Provisions of the NSPS at 40 CFR part 60, subpart A and any changes, or additions to the Provisions specified at 40 CFR part 60, subpart SS.

Owners or operators of the affected facilities must make an initial notification, performance tests, periodic reports, and maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. Reports are also required semiannually.

Burden Statement

The annual public reporting and recordkeeping burden for this collection of information is estimated to average 27 hours per response. "Burden" means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Facilities that conduct surface coating operations for large appliances.

Estimated Number of Respondents: 72.

Frequency of Response: Occasionally and semiannually.

Estimated Total Annual Hour Burden: 7,659.

Estimated Total Annual Cost: \$750,011, which includes \$741,611 in labor costs, no capital/startup costs, and \$8,400 in operation and maintenance (O&M) costs.

Changes in the Estimates: There is no change in the labor hours in this ICR

compared to the previous ICR. This is due to two considerations: (1) The regulations have not changed over the past three years and are not anticipated to change over the next three years; and (2) the growth rate for the industry is very low, negative or non-existent, so there is no significant change in the overall burden. However, there is an adjustment increase in burden costs for both the respondents and the Agency. The cost increase is due to an adjustment in labor rates. This ICR uses updated labor rates from the Bureau of Labor Statistics to calculate burden costs.

Additionally, there is an increase in the total number of annual responses due to a mathematical correction made in the previous ICR.

John Moses,

Director, Collection Strategies Division.
