SUPPLEMENTARY INFORMATION: Chapter 19 of the North American Free-Trade Agreement (“Agreement”) established a mechanism to replace domestic judicial review of final determinations in antidumping and countervailing duty cases involving imports from a NAFTA country with review by independent binational panels. When a Request for Panel Review is filed, a panel is established to act in place of national courts to review expeditiously the final determination to determine whether it conforms with the antidumping or countervailing duty law of the country that made the determination.

Under Article 1904 of the Agreement, which came into force on January 1, 1994, the Government of the United States, the Government of Canada, and the Government of Mexico established *Rules of Procedure for Article 1904 Binational Panel Reviews* (“Rules”). These Rules were published in the **Federal Register** on February 23, 1994 (59 FR 8686).

A first Request for Panel Review was filed with the Mexican Section of the NAFTA Secretariat, pursuant to Article 1904 of the Agreement, on September 3, 2012, requesting a panel review of the determination and order described above.

The Rules provide that:

(a) A Party or interested person may challenge the final determination in whole or in part by filing a Complaint in accordance with Rule 39 within 30 days after the filing of the first Request for Panel Review;

(b) A Party, investigating authority or interested person that does not file a Complaint but that intends to appear in support of any reviewable portion of the final determination may participate in the panel review by filing a Notice of Appearance in accordance with Rule 40 within 45 days after the filing of the first Request for Panel; and

(c) The panel review shall be limited to the allegations of error of fact or law, including the jurisdiction of the investigating authority, that are set out in the Complaints filed in panel review and the procedural and substantive defenses raised in the panel review.

Dated: November 29, 2012.

United States Secretary, NAFTA Secretariat.

This research would take place in and around the Dry Tortugas National Park, and in the coastal waters off Florida in the Gulf of Mexico. The objectives of the research are to: (1) Obtain information on fine-scale temporal and spatial patterns of sea turtle habitat use and movement patterns inside and outside the National Park; (2) examine diet through stable isotope analysis; and (3) determine genetic distinctiveness and connectivity to other populations. Researchers would capture sea turtles by rodeo capture, cast net, tangle net, dip net or hand capture. Turtles would be weighed, measured, flipper tagged, passive integrated transponder tagged, blood sampled, tissue sampled, scute sampled, epibiota sampled, fecal sampled, undergo gastric lavage, temporarily carapace marked, photographed, and released. A subset of turtles would be fitted with some combination of up to three telemetry tags—e.g., satellite tag, acoustic transmitter, and/or accelerometer,—and tracked; upon recapture, these animals would have the tags removed.
