**Fisheries of the Caribbean, Gulf of Mexico, and South Atlantic; Snapper-Grouper Fishery of the South Atlantic; Exempted Fishing Permit**

**AGENCY:** National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

**ACTION:** Notice of receipt of an application for an exempted fishing permit; request for comments.

**SUMMARY:** NMFS announces the receipt of an application for an exempted fishing permit (EFP) from Dr. John R. Gold (Texas A&M University). If granted, the EFP would authorize the applicant to use the captain and crew of a charter vessel to collect a total of 125–150 adult red snapper, south of the Florida Keys and near the Dry Tortugas, FL. Samples would be collected over multiple trips using conventional hook-and-line gear from deep water. Small pieces of fin tissue and otoliths would be collected from the fish for genetic analysis, and age and growth studies. Additional information on the geographic origin, degree of connectivity, and life history of red snapper would provide the South Atlantic Fishery Management Council (Council) and NMFS data that may be used for future management of red snapper stocks in the South Atlantic and Gulf of Mexico (Gulf). Collections would occur from April 1, 2013, to March 31, 2014.

**DATES:** Comments must be received no later than 5 p.m., eastern time, on March 21, 2013.

**ADDRESSES:** You may submit comments, identified by RIN 0648–XC414, on the application by any of the following methods:

- *Email:* [nikhil.mehta@noaa.gov](mailto:nikhil.mehta@noaa.gov).

Include in the subject line of the email comment the following document identifier: “John Gold EFP 2013”.

- *Mail:* Nikhil Mehta, Southeast Regional Office, NMFS, 263 13th Avenue South, St. Petersburg, FL 33701.

The application and related documents are available for review upon written request to any of the above addresses.

**FOR FURTHER INFORMATION CONTACT:** Nikhil Mehta, 727–824–5305; email: [Nikhil.mehta@noaa.gov](mailto:Nikhil.mehta@noaa.gov).

**SUPPLEMENTARY INFORMATION:** The EFP is requested under the authority of the

Magnuson-Stevens Fishery Conservation and Management Act (16 U.S.C. 1801 *et seq.*), and regulations at 50 CFR 600.745(b) concerning exempted fishing.

The described research is part of a Marine Fisheries Initiative funded study titled, “Stock structure, connectivity, and effective population size of red snapper (*Lutjanus campechanus*) in U.S. waters of the Gulf of Mexico.” Objectives of the study are to: (i) Further refine a geographic stock model in areas from southern Texas to the southwest coast of Florida; (ii) quantify historical and present connectivity (genetic migration) among sampled locations in the Gulf and South Atlantic; and (iii) utilize recently developed algorithms to estimate the effective number of breeding adult red snapper at each sampling location.

If granted, the EFP would authorize the applicant and the captain and crew of a charter vessel to collect a total of 125–150 red snapper using conventional hook-and-line gear from deep water (200–240 ft (61–73 m)). Red snapper would be collected over multiple 2–3 day trips south of the Florida Keys and near the Dry Tortugas, FL. The fish would be placed on ice and the fins removed at the end of each fishing day. Small pieces of red snapper fin tissue would be placed into sample tubes containing a non-flammable, non-explosive fixative. Upon reaching the dock, all the fish and tubes with fin clips would be collected by a NMFS port sampler. After a total of 125–150 red snapper have been sampled, the fin clips would be shipped to the laboratory at Texas A&M University in College Station, TX, for genetic analysis. Otoliths would also be removed from the collected red snapper by the NMFS port sampler to facilitate age and growth studies.

The proposed collection for scientific research involves activities that would otherwise be prohibited by regulations at 50 CFR part 622, as they pertain to red snapper managed by the Council. The EFP would exempt this research activity from Federal regulations at § 622.32(b)(3)(vi) (Prohibited and limited harvest species) and § 622.37(e)(v) (Size limits).

NMFS finds this application warrants further consideration. Possible conditions the agency may impose on this permit, if it is granted, include but are not limited to, a prohibition of conducting research within marine protected areas, marine sanctuaries, or special management zones, without additional authorization. A report on the research would be due at the end of

the collection period, to be submitted to NMFS and reviewed by the Council.

A final decision on issuance of the EFP will depend on NMFS’ review of public comments received on the application, consultations with appropriate fishery management agencies of the affected states, the Council, and the U.S. Coast Guard, as well as a determination that it is consistent with all applicable laws.

### New England Fishery Management Council; Public Meeting

**AGENCY:** National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

**ACTION:** Notice; public meeting.

**SUMMARY:** The New England Fishery Management Council's (Council) Groundfish Oversight Committee will meet jointly with its Groundfish Advisory Panel to consider actions affecting New England fisheries in the exclusive economic zone (EEZ).

**DATES:** The meeting will be held on Wednesday, March 6, 2013 at 9 a.m.

**ADDRESSES:** The meeting will be held at the Sheraton Colonial, One Audubon Road, Wakefield, MA 01880; telephone: (781) 245-9300; fax: (781) 245-0842.

**Council address:** New England Fishery Management Council, 50 Water Street, Mill 2, Newburyport, MA 01950. **FOR FURTHER INFORMATION CONTACT:** Paul J. Howard, Executive Director, New England Fishery Management Council; telephone: (978) 465-0492.

**SUPPLEMENTARY INFORMATION:** The Groundfish Committee will hold a joint meeting with the Groundfish Advisory Panel (GAP). The primary purpose of the meeting is to resume work on the development of Amendment 18 to the Northeast Multispecies Fishery Management Plan (A18). A18 is being developed with two broad objectives; (1) to consider the establishment of accumulation caps for the groundfish fishery and; (2) to consider issues associated with fleet diversity in the multispecies fishery. A Notice of Intent to prepare an environmental impact statement (EIS) for this amendment was filed published on December 21, 2011 (76 FR 79153). After completing a scoping period in early summer of 2012, progress on this amendment was delayed while the Council completed other management actions. At this meeting, the Committee and GAP will review scoping comments received, analyses developed by the Plan Development Team (PDT), and other comments. The Committee and GAP will develop a plan to move forward on this amendment. They may also receive an update on a Transboundary Management Guidance Committee (TMGC) meeting that will be held in February and may address other groundfish management priorities for FY 2013, including modifications to rebuilding plans. Other business may be discussed as necessary.

Although non-emergency issues not contained in this agenda may come before this group for discussion, those issues may not be the subject of formal action during this meeting. Action will be restricted to those issues specifically identified in this notice and any issues arising after publication of this notice that require emergency action under

section 305(c) of the Magnuson-Stevens Fishery Conservation and Management Act, provided the public has been notified of the Council's intent to take final action to address the emergency.
