Office of the Chief Information Officer

Title: USDA eAuthentication Service Customer Registration.

OMB Control Number: 0503–0014.

Summary of Collection: The USDA Office of the Chief Information Officer (OCIO) has developed the eAuthentication system as a management and technical process that addresses user authentication and authorization prerequisites for providing services electronically. The process requires a voluntary one-time electronic self-registration to obtain an eAuthentication account for each USDA customer desiring access to online services or applications that require user eAuthentication. The information collected through the electronic self-registration process is necessary to enable the electronic authentication of users and grant them access to only those resources for which they are authorized. The authority to collect this information as well as the new Online Identity Proofing function can be found in Section 2,(c), of the Freedom to E-File Act (Pub. L. 106–222), the Government Paperwork Elimination Act (GPEA, Pub. L. 105–277), the Electronic Signatures in Global and National Commerce Act (E-Sign, Pub. L. 106–229), and the E-Government Act of 2002 (H.R. 2458).

Need and Use of the Information: The USDA eAuthentication Service provides public and government businesses single sign-on capability for USDA applications, management of user credentials, and verification of identify, authorization, and electronic signatures. USDA eAuthentication obtains customer information through an electronic self-registration process provided through the eAuthentication Web site. The voluntary self-registration process applies to USDA Agency customers, as well as employees who request access to protected USDA Web applications and services via the Internet. Users can register directly from the eAuthentication Web site located at *www.eauth.egov.usda.gov*. The information collected through the online self-registration process will be used to provide an eAuthentication account that will enable the electronic authentication of users. The users will then have access to authorized resources without needing to reauthenticate

within the context of a single Internet session.

Forest product and other wood-using industries are important to state, regional, and national economies. In most southern states, the value of rounded timber products is ranked either first or second in relation to other major agricultural crops. The importance and value of the timber products industry is significant in other regions of the United States as well. The FS will collect information using questionnaires.

Need and Use of the Information: To monitor the types, species, volumes, sources, and prices of the timber products harvested throughout the Nation. Using the “Primary Mill Questionnaire” FS will collect industrial round wood information from the primary wood-using industries throughout the United States and from mills in Canada that directly receive wood from the United States. FS will also use the “Pulp & Board Forest Industries Questionnaire.” The data will be used to develop specific economic development plans for a new forest-related industry in a State and to assist existing industries in identifying raw material problems and opportunities. If the information were not collected, data would not be available for sub-state, state, regional and national policy makers and program developers to make decisions related to the forestland on a scientific basis.
