

2. Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

3. Enhance the quality, utility, and clarity of the information to be collected; or

4. Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.

SUPPLEMENTARY INFORMATION: The Technical Resource for Incident Prevention (TRIPwire) is OBP's online, collaborative, information-sharing network for bomb squad, law enforcement, and other emergency services personnel to learn about current terrorist improvised explosive device (IED) tactics, techniques, and procedures, including design and emplacement considerations. TRIPwire was established as an IED information-sharing resource under Homeland Security Presidential Directive 19 (HSPD-19), which calls for a unified national policy for the prevention and detection of, protection against, and response to terrorist use of explosives in the United States. Users from Federal, state, local, and tribal government entities, as well as business and for-profit industries can register through the TRIPwire Secure Portal. The TRIPwire portal contains sensitive information related to terrorist use of explosives and therefore user information is needed to verify eligibility and access to the system. TRIPwire applicants must provide their full name, assignment, citizenship, job title, employer name, professional address and contact information, as well as an Employment Verification Contact and their contact information. The system does not store sensitive personally identifiable information (PII) such as social security numbers. The collection of PII by TRIPwire to establish user accounts occurs in accordance with the DHS Privacy Impact Assessment PIA-015, "DHS Web Portals," DHS/ALL-004—General Information Technology Access Account Records System (GITAARS) September 29, 2009, 74 FR 49882, and DHS/ALL-002—Department of Homeland Security Mailing and Other Lists System November 25, 2008, 73 FR 71659. The TRIPwire User Registration is a voluntary registration designed to measure users' suitability to access the secure environment.

The information collected during the TRIPwire user registration process is reviewed electronically by the project team to vet the user's "need to know," which determines their eligibility for and access to TRIPwire. Memberships are re-verified annually based on the information users provide upon registration or communication with the TRIPwire help desk analysts. The information collected is for internal TRIPwire and OBP use only.

AGENCY: Transportation Security Administration, DHS.

ACTION: 30-day notice.

SUMMARY: This notice announces that the Transportation Security Administration (TSA) has forwarded the Information Collection Request (ICR), Office of Management and Budget

(OMB) control number 1652-0027, abstracted below to OMB for review and approval of an extension of the currently approved collection under the Paperwork Reduction Act (PRA). The ICR describes the nature of the information collection and its expected burden. TSA published a **Federal Register** notice, with a 60-day comment period soliciting comments, of the following collection of information on October 22, 2012, 77 FR 64533. The collection involves applicant submission of biometric and biographic information for TSA's security threat assessment required before obtaining the hazardous materials endorsement (HME) on a commercial drivers license (CDL) issued by the States and the District of Columbia.

DATES: Send your comments by March 29, 2013. A comment to OMB is most effective if OMB receives it within 30 days of publication.

ADDRESSES: Interested persons are invited to submit written comments on the proposed information collection to the Office of Information and Regulatory Affairs, OMB. Comments should be addressed to Desk Officer, Department of Homeland Security/TSA, and sent via electronic mail to oir_submission@omb.eop.gov or faxed to (202) 395-6974.

SUPPLEMENTARY INFORMATION:

Comments Invited

In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), an agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a valid OMB control number. The ICR documentation is available at www.reginfo.gov. Therefore, in preparation for OMB review and approval of the following information collection, TSA is soliciting comments to—

(1) Evaluate whether the proposed information requirement is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of the agency's estimate of the burden;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, including using appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Information Collection Requirement

Title: Security Threat Assessment for Individuals Applying for a Hazardous Materials Endorsement for a Commercial Drivers License

Type of Request: Revision of a currently approved collection.

OMB Control Number: 1652-0027.

Forms(s): N/A.

Affected Public: Drivers seeking a hazardous material endorsement (HME) on their commercial driver's license (CDL).

Abstract: This collection supports the implementation of sec. 1012 of the USA PATRIOT Act (Pub. L. 107-56, 115 Stat. 272, 396, Oct. 26, 2001; 49 U.S.C. 5103a), which mandates that no State or the District of Columbia may issue a HME on a CDL unless TSA has first determined the driver is not a threat to transportation security. TSA's regulations at 49 CFR part 1572 describe the procedures, standards, and eligibility criteria for security threat assessments on individuals seeking to obtain, renew, or transfer a HME on a CDL. In order to conduct the security threat assessment, States (or a TSA designated agent in States that elect to have TSA perform the collection of information) must collect information in addition to that already collected for the purpose of HME applications, which will occur once approximately every five years. The driver is required to submit an application that includes personal biographic information (for instance, height, weight, eye and hair color, date of birth); information concerning legal status, mental health defects history, and criminal history; and fingerprints. In addition, 49 CFR part 1572 requires States to maintain a copy of the driver application for a period of one year.

TSA proposes to amend the application to collect minor additional information, such as legal status document information and whether the driver is a new applicant or renewing or transferring the HME. This will enable TSA to better understand and forecast driver retention, transfer rate, and drop-rate, thus improving customer service, reducing program costs, and enhancing comparability with other Federal background checks, including the Transportation Workers Identification Credential (TWIC).

Number of Respondents: 295,000.

Estimated Annual Burden Hours: An estimated 960,000 hours annually.

Issued in Arlington, Virginia, on February 21, 2013.

Susan Perkins,

TSA Paperwork Reduction Act Officer, Office of Information Technology.
