

capacity and energy are supplied to the Pacific Northwest-Pacific Southwest Intertie Project (Intertie) transmission system at points of interconnection with other systems and transmitted and delivered, less losses, to points of delivery on the Intertie transmission system.

**Long-Term Rate:** For transmission service of one year or longer, the rate is \$19.32 for each kilowatt (kW) per year, payable monthly at the rate of \$1.61 for each kW per month.

**Short-Term Rates:** For transmission service up to one year, the maximum rate for each kW is as follows:

Monthly: \$1.61

Weekly: \$0.3715

Daily: \$0.0529

Hourly: 2.21 mills

Discounts may be offered from time-to-time in accordance with Western's Open Access Transmission Tariff (OATT).

**Billing:** Western will bill firm point-to-point transmission service customers monthly by applying the rates listed above to the amount of capacity reserved. Payment for long-term transmission service will be required one month in advance of said service.

**Character and Conditions of Service:** Alternating current at 60 hertz, three-phase, delivered and metered at the voltages and points of delivery established by the service agreement or contract.

**Adjustments for Reactive Power:** There shall be no entitlement to transfer of reactive kilovolt-amperes at delivery points, except when such transfers may be mutually agreed upon by the customer and Western or their authorized representatives.

**Adjustments for Losses:** Capacity and energy losses incurred in connection with the transmission and delivery of capacity and energy under this rate schedule shall be supplied by the customer in accordance with the service agreement or contract. If losses are not fully provided by a customer, charges for financial compensation may apply.

**Unreserved Use:** Western will assess a charge for any unreserved use of the transmission system. Unreserved use occurs when a customer uses transmission service that it has not reserved or uses transmission service in excess of its reserved capacity. Unreserved use may also include a customer's failure to curtail transmission when requested.

The charge for unreserved use is two times the maximum allowable rate for the service at issue, assessed as follows: The penalty for a single hour of unreserved use is based on the daily

short-term rate. The penalty for more than one assessment of unreserved use for any given duration (e.g., daily) increases to next longest duration (e.g., weekly). The penalty for multiple instances of unreserved use (e.g., more than one hour) within a day is based on the daily short-term rate. The penalty for multiple instances of unreserved use isolated to one calendar week is based on the weekly short-term rate. The penalty for multiple instances of unreserved use during more than one week in a calendar month is based on the monthly short-term rate.

A customer that exceeds its reserved capacity at any point of receipt or point of delivery, or a customer that uses transmission service at a point of receipt or point of delivery that it has not reserved, is required to pay for all ancillary services that were provided by the Western Area Lower Colorado (WALC) Balancing Authority and associated with the unreserved use. The customer will pay for ancillary services based on the amount of transmission service used and not reserved.

#### **Nonfirm Transmission Service**

**Effective:** The first day of the first full billing period beginning on or after May 1, 2013, and will remain in effect through April 30, 2018, or until superseded by another rate schedule.

**Applicable:** To nonfirm transmission service customers where capacity and energy are supplied to the Northwest-Pacific Southwest Intertie Project (Intertie) transmission system at points of interconnection with other systems and transmitted and delivered, less losses, to points of delivery on the Intertie transmission system.

**Rate:** The nonfirm transmission service rate is 2.21 mills for each kilowatt per hour. Discounts may be offered from time-to-time in accordance with Western's Open Access Transmission Tariff (OATT).

**Billing:** Western will bill nonfirm transmission service customers monthly by applying the rate listed above to the amount of capacity reserved.

**Character and Conditions of Service:** Alternating current at 60 hertz, three-phase, interruptible, delivered and metered at the voltages and points of delivery established by service agreement or in advance by Western. Curtailment conditions shall be determined by Western and in accordance with Western's OATT.

**Adjustments for Reactive Power:** There shall be no entitlement to transfer of reactive kilovolt amperes at delivery points, except when such transfers may be mutually agreed upon by the

customer and Western or their authorized representatives.

**Adjustment for Losses:** Capacity and energy losses incurred in connection with the transmission and delivery of capacity and energy under this rate schedule shall be supplied by the customer in accordance with the service agreement or contract. If losses are not fully provided by a customer, charges for financial compensation may apply.

**Unreserved Use:** Western will assess a charge for any unreserved use of the transmission system. Unreserved use occurs when a customer uses transmission service that it has not reserved or uses transmission service in excess of its reserved capacity. Unreserved use may also include a customer's failure to curtail transmission when requested.

The charge for unreserved use is two times the maximum allowable rate for the service at issue, assessed as follows: The penalty for a single hour of unreserved use is based on the daily short-term rate. The penalty for more than one assessment of unreserved use for any given duration (e.g., daily) increases to next longest duration (e.g., weekly). The penalty for multiple instances of unreserved use (e.g., more than one hour) within a day is based on the daily short-term rate. The penalty for multiple instances of unreserved use isolated to one calendar week is based on the weekly short-term rate. The penalty for multiple instances of unreserved use during more than one week in a calendar month is based on the monthly short-term rate.

A customer that exceeds its reserved capacity at any point of receipt or point of delivery, or a customer that uses transmission service at a point of receipt or point of delivery that it has not reserved, is required to pay for all ancillary services that were provided by the Western Area Lower Colorado (WALC) Balancing Authority and associated with the unreserved use. The customer will pay for ancillary services based on the amount of transmission service used and not reserved.

Requests to present oral comments will be accepted until the date of the meeting and, to the extent that time permits, the Chair of FIFRA SAP may permit the presentation of oral comments at the meeting by interested persons who have not previously requested time. The request should identify the name of the individual making the presentation, the organization (if any) the individual will represent, and any requirements for audiovisual equipment (e.g., overhead projector, 35 mm projector, chalkboard). Oral comments before FIFRA SAP are limited to approximately 5 minutes unless prior arrangements have been made. In addition, each speaker should bring 25 copies of his or her comments and presentation slides for distribution to the FIFRA SAP at the meeting.

3. *Seating at the meeting.* Seating at the meeting will be open and on a first-come basis.

4. *Request for nominations to serve as ad hoc members of FIFRA SAP for this meeting.* As part of a broader process for developing a pool of candidates for each meeting, FIFRA SAP staff routinely solicits the stakeholder community for nominations of prospective candidates for service as ad hoc members of FIFRA SAP. Any interested person or organization may nominate qualified individuals to be considered as prospective candidates for a specific meeting. Individuals nominated for this meeting should have expertise in one or more of the following areas:

- Ecotoxicology (fish, avian, and/or amphibian toxicology);
  - Comparative Endocrinology and Endocrine Toxicology;
  - Histopathology;
  - Biostatistics;
  - Population Modeling;
  - Regulatory toxicology/risk assessment;
  - Invertebrate Toxicology and Endocrinology;
  - Reproductive physiology;
  - Developmental biology/toxicology;
  - Thyroid physiology;
  - Toxicological pathology;
  - Morphometrics;
  - Quantitative ecology/biostatistics;
- and
- Systems biology.

Nominees should be scientists who have sufficient professional qualifications, including training and experience, to be capable of providing expert comments on the scientific issues for this meeting. Nominees should be identified by name, occupation, position, address, and telephone number. Nominations should be provided to the DFO listed under **FOR FURTHER INFORMATION CONTACT** on or before April 16, 2013. The Agency will consider all nominations of prospective candidates for this meeting that are received on or before this date. However, final selection of ad hoc members for this meeting is a discretionary function of the Agency.

The selection of scientists to serve on FIFRA SAP is based on the function of the panel and the expertise needed to address the Agency's charge to the panel. No interested scientists shall be ineligible to serve by reason of their membership on any other advisory committee to a Federal department or agency or their employment by a Federal department or agency except the EPA. Other factors considered during the selection process include availability of the potential panel member to fully participate in the panel's reviews, absence of any conflicts

of interest or appearance of lack of impartiality, independence with respect to the matters under review, and lack of bias. Although financial conflicts of interest, the appearance of lack of impartiality, lack of independence, and bias may result in disqualification, the absence of such concerns does not assure that a candidate will be selected to serve on FIFRA SAP. Numerous qualified candidates are identified for each panel. Therefore, selection decisions involve carefully weighing a number of factors including the candidates' areas of expertise and professional qualifications and achieving an overall balance of different scientific perspectives on the panel. In order to have the collective breadth of experience needed to address the Agency's charge for this meeting, the Agency anticipates selecting approximately 12–15 ad hoc scientists.

FIFRA SAP members are subject to the provisions of 5 CFR part 2634, Executive Branch Financial Disclosure, as supplemented by the EPA in 5 CFR part 6401. In anticipation of this requirement, prospective candidates for service on the FIFRA SAP will be asked to submit confidential financial information which shall fully disclose, among other financial interests, the candidate's employment, stocks and bonds, and where applicable, sources of research support. The EPA will evaluate the candidates financial disclosure form to assess whether there are financial conflicts of interest, appearance of a lack of impartiality or any prior involvement with the development of the documents under consideration (including previous scientific peer review) before the candidate is considered further for service on FIFRA SAP. Those who are selected from the pool of prospective candidates will be asked to attend the public meetings and to participate in the discussion of key issues and assumptions at these meetings. In addition, they will be asked to review and to help finalize the meeting minutes. The list of FIFRA SAP members participating at this meeting will be posted on the FIFRA SAP Web site at <http://www.epa.gov/scipoly/sap> or may be obtained from the OPP Docket or at <http://www.regulations.gov>.

## II. Background

### A. Purpose of FIFRA SAP

FIFRA SAP serves as the primary scientific peer review mechanism of EPA's Office of Chemical Safety and Pollution Prevention (OCSPP) and is structured to provide scientific advice, information and recommendations to the EPA Administrator on pesticides

and pesticide-related issues as to the impact of regulatory actions on health and the environment. FIFRA SAP is a Federal advisory committee established in 1975 under FIFRA that operates in accordance with requirements of the Federal Advisory Committee Act. FIFRA SAP is composed of a permanent panel consisting of seven members who are appointed by the EPA Administrator from nominees provided by the National Institutes of Health and the National Science Foundation. FIFRA established a Science Review Board consisting of at least 60 scientists who are available to the SAP on an ad hoc basis to assist in reviews conducted by the SAP. As a peer review mechanism, FIFRA SAP provides comments, evaluations and recommendations to improve the effectiveness and quality of analyses made by Agency scientists. Members of FIFRA SAP are scientists who have sufficient professional qualifications, including training and experience, to provide expert advice and recommendation to the Agency.

### B. Public Meeting

Section 408(p) of the Federal Food Drug and Cosmetic Act (FFDCA) requires the EPA to:

Develop a screening program, using appropriate validated test systems and other scientifically relevant information, to determine whether certain substances may have an effect in humans that is similar to an effect produced by a naturally occurring estrogen, or such other endocrine effect as the Administrator may designate (21 U.S.C. 346a(p)).

Subsequent to passage of the Food Quality Protection Act in 1996, which amended FFDCA and FIFRA, and amendments to the Safe Drinking Water Act the same year, the EPA formed the Endocrine Disruptor Screening and Testing Advisory Committee (EDSTAC), a Federal advisory committee of scientists and stakeholders that was charged by the EPA to provide recommendations on how to implement its EDSP. The EDSP is described in detail at the following Web site: <http://www.epa.gov/scipoly/oscpendo/>. Based on the recommendations from the EDSTAC (EDSTAC 1998), the EPA made a number of key decisions using the Administrator's discretionary authority to include not only the estrogen hormonal pathway, but the androgen and thyroid pathways of the endocrine system in humans as well as in wildlife.

The EDSTAC also recommended the Agency adopt a two-tiered screening and testing program. Tier 1 is an integrated battery of relatively short-term *in vitro* and *in vivo* assays designed to detect the potential of a chemical to

interact with the endocrine system, principally the estrogen, androgen, and thyroid hormonal pathways. Test chemicals determined to have the potential to interact with the endocrine system, based on a weight-of-evidence analysis of the results of Tier 1 screening and inclusive of other scientifically relevant information, would be considered for Tier 2 testing. Tier 2 tests consist of more comprehensive, long-term tests during various life stages and multiple generations enhanced with endocrine-specific endpoints across multiple taxonomic groups, including mammals, birds, fish, amphibians, and invertebrates. The purpose of Tier 2 testing is to identify any potential adverse outcome and provide quantitative concentration-response information that may be used for risk assessment.

The EDSP is mandated under FFDCA to use "validated" assays to screen and test for endocrine disrupting chemicals. The focus of this SAP review is on the validation status, based on Organization for Economic Co-Operation and Development (OECD) and Interagency Coordinating Committee on the Validation of Alternative Methods (ICCVAM) validation principles, for the proposed EDSP Tier 2 ecotoxicity tests including:

1. Japanese quail two-generation toxicity test.
2. Larval amphibian growth and development assay.
3. Medaka multigeneration test.
4. Mysid two-generation toxicity test.

The EDSP Tier 2 ecotoxicity tests have been developed and validated based on selected chemicals known to interact with the estrogen, androgen and/or thyroid hormonal pathways of the endocrine system. In general, the performance of respective Tier 2 ecotoxicity tests to determine the magnitude and duration of endocrine mediated effects and quantitatively assess concentration-response relationships will be the focus of this SAP. The SAP will be asked to comment on the reproducibility of results and factors that may impact interpretation of whether or not the proposed Tier 2 tests are sufficient to provide a more comprehensive assessment of the potential of a test chemical to cause endocrine mediated adverse effects in the subject taxa.

#### *C. FIFRA SAP Documents and Meeting Minutes*

EPA's background paper, related supporting materials, charge/questions to FIFRA SAP, FIFRA SAP composition (i.e., members and ad hoc members for

this meeting), and the meeting agenda will be available approximately 15 days prior to the meeting. In addition, the Agency may provide additional background documents as the materials become available. You may obtain electronic copies of these documents, and certain other related documents that might be available electronically, at <http://www.regulations.gov> and the FIFRA SAP homepage at <http://www.epa.gov/scipoly/sap>.

FIFRA SAP will prepare meeting minutes summarizing its recommendations to the Agency approximately 90 days after the meeting. The meeting minutes will be posted on the FIFRA SAP Web site or may be obtained from the OPP Docket or at <http://www.regulations.gov>.
