

1.5 It is clear that the law requires commercial refrigerators to be tested and certified using the test procedure set forth at 10 C.F.R. Pt 431, Subpt. C, Sec. 431.64—or be subject to a waiver—before they are sold in commerce. But DOE's test procedure which establishes the $0^{\circ}\text{F} \pm 2^{\circ}\text{F}$ AIT criteria based on the low temperature application does not contemplate commercial refrigerators that are designed to display frozen meat (an AIT of 8°F — 18°F).

1.6 There is no existing DOE Test Procedure without a waiver establishing an alternative test procedure for such products, there is no way to know how a model of such product should be tested, whether a model complies with the standard, and how the model's energy use compares to others with similar features.

1.7 Testing of commercial refrigerators intended to display frozen meat at 0°F would increase the energy consumption and defeat the intent and spirit of energy conservation set forth by DOE. (NOTE: These cases do meet the maximum energy allowance limits set forth by DOE for the applicable DOE Equipment Class with the current AIT of 8°F — 18°F range. Reducing the AIT to 0°F only for test purposes will increase the energy consumption.)

Basic Models on which the Interim Waiver is being requested:

M1XL-4GE, M1XL-6GE, M1XL-8GE,
M1XL-12GE
M1XLD-4GE, M1XLD-6GE, M1XLD-
8GE, M1XLD-12GE

Specific Requirements sought to be waived—Commercial Refrigerators intended to display frozen meat shall be exempt from DOE's requirement to test and certify in accordance with 10 C.F.R. Pt 431 and be exempt from certification, compliance and enforcement in accordance with 10 C.F.R. Pt 429.

Alternate test procedures known to the petitioner to evaluate the characteristics of the basic model in a manner representative of its energy consumption—An alternate test temperature of 12 ± 2 degrees Fahrenheit would be an acceptable test temperature.

Success of the application for Interim Waiver will: Ensure that the spirit and intent of conserving energy by DOE is followed and maintained.

What economic hardship and/or competitive disadvantage are likely to result absent a favorable determination on the Application for Interim Waiver—Economic hardship will be loss of sales due to not meeting the DOE requirements set forth. If the existing products were altered to meet the current DOE requirements, it would

add significant cost and increase energy consumption.

Conclusion:

Hussmann Corporation seeks an Interim Waiver from DOE's current requirement to test and certify in accordance with 10 C.F.R. Pt 431 and be exempt from certification, compliance and enforcement in accordance with 10 C.F.R. Pt. 429. Such a waiver is necessary because the current prescribed test procedures produce materially inaccurate and unrepresentative data for regulatory and consumer information purposes.

Hussmann Corporation respectfully asks the Department of Energy to grant an Interim Waiver from existing test standards until such time as a representative test procedure is developed and adopted for this class of products.

If we can provide further information, or if it would be helpful to discuss any of these matters further, please contact Ron Shebik, Compliance Manager, at (314) 298-6483.

Sincerely,
Ron Shebik,
Compliance Manager, Hussmann
