

As mentioned previously, NMFS estimates that 3 species of marine mammals under its jurisdiction could be potentially affected by Level B harassment over the course of the IHA. It is estimated that 600 individual Pacific harbor seals, 2 individual California sea lions, and 1 northern elephant seal will be taken (multiple times) by Level B harassment, which would be approximately 1.98, less than 0.01, and less than 0.01 of the respective stocks. The population estimates for the marine mammal species that may be taken by Level B harassment were provided in Table 2 of this document. NMFS's practice has been to apply the 90 dB re 20  $\mu$ Pa and 100 dB re 20  $\mu$ Pa received level threshold for in-air sound levels to determine whether take by Level B harassment occurs. Southall *et al.* (2007) provide a severity scale for ranking observed behavioral responses of both free-ranging marine mammals and laboratory subjects to various types of anthropogenic sound (see Table 4 in Southall *et al.* [2007]). NMFS has not established a threshold for Level A harassment (injury) for marine mammals exposed to in-air noise, however, Southall *et al.* (2007) recommends 149 dB re 20  $\mu$ Pa (peak flat) as the potential threshold for injury from in-air noise for all pinnipeds. No in-air sounds from demolition and construction activities will exceed 110 dB at the source.

While behavioral modifications, including temporarily vacating the area during the demolition and construction activities, may be made by these species to avoid the resultant acoustic disturbance, the availability of alternate areas within these areas for species and the short and sporadic duration of the activities, have led NMFS to preliminarily determine that the taking by Level B harassment from the specified activity will have a negligible impact on the affected species in the specified geographic region. NMFS believes that the time period of the demolition and construction activities, the requirement to implement mitigation measures (e.g., prohibiting demolition and construction activities during pupping season, scheduling operations to periods of the lowest haul-out occurrence, and visual and acoustic barriers), and the inclusion of the monitoring and reporting measures, will reduce the amount and severity of the potential impacts from the activity to the degree that will have a negligible impact on the species or stocks in the action area.

NMFS has preliminarily determined, provided that the aforementioned mitigation and monitoring measures are

implemented, that the impact of the demolition and construction activities at the Children's Pool Lifeguard Station in La Jolla, California, June to December, 2013, may result, at worst, in a temporary modification in behavior and/or low-level physiological effects (Level B harassment) of small numbers of certain species of marine mammals. See Table 2 for the requested authorized take numbers of marine mammals.

#### **Impact on Availability of Affected Species or Stock for Taking for Subsistence Uses**

Section 101(a)(5)(D) of the MMPA also requires NMFS to determine that the authorization will not have an unmitigable adverse effect on the availability of marine mammal species or stocks for subsistence use. There are no relevant subsistence uses of marine mammals in the study area (off of southern California in the northeast Pacific Ocean) that implicate MMPA section 101(a)(5)(D).

#### **Endangered Species Act**

NMFS (Permits and Conservation Division) has determined that a section 7 consultation for the issuance of an IHA under section 101(a)(5)(D) of the MMPA for this activity is not necessary for any ESA-listed marine mammal species under its jurisdiction as the proposed action will not affect ESA-listed species.

#### **National Environmental Policy Act**

NMFS will conduct a NEPA analysis to evaluate the effects of authorizing the proposed take of marine mammals prior to making a final determination on the issuance of the IHA. This notice, and referenced documents, including the IHA application provide the environmental issues and information relevant to the demolition and construction activities as well as those specific to NMFS's issuance of the IHA.

#### **Proposed Authorization**

NMFS proposes to issue an IHA to the City of San Diego, provided the previously mentioned mitigation, monitoring, and reporting requirements are incorporated. The duration of the IHA would not exceed one year from the date of its issuance.

#### **Information Solicited**

NMFS requests interested persons to submit comments and information concerning this proposed project and NMFS's preliminary determination of issuing an IHA (see **ADDRESSES**). Concurrent with the publication of this notice in the **Federal Register**, NMFS is forwarding copies of this application to

the Marine Mammal Commission and its Committee of Scientific Advisors.
