

Reclamation has determined that it no longer needs the 185.88 acres of public lands for reclamation purposes.

The Niobrara Scenic River Designation Act of 1991 made the 185.88 acres subject to management under the Wild and Scenic Rivers Act of 1968, Public Law 90–542 (16 U.S.C. 1271–1287), which specifically authorizes the transfer of Federal land for administration for river management purposes in accordance with the Act. Pursuant to Section 6(e) of the Wild and Scenic Rivers Act of 1968, 16 U.S.C. 1277(e), the National Park Service requested that the 185.88 acres be transferred to its administrative jurisdiction for management under the provisions of the Wild and Scenic Rivers Act and the Niobrara Scenic River Designation Act of 1991.

SUPPLEMENTARY INFORMATION:

I. Background

The NRC is issuing a revision to an existing guide in the NRC's "Regulatory Guide" series. Regulatory guides were developed to describe and make available to the public information methods that are acceptable to the NRC staff for implementing specific parts of the agency's regulations, techniques that the staff uses in evaluating specific problems or postulated accidents, and data that the staff needs in its review of applications for permits and licenses. The NRC typically seeks public comment on a draft version of a regulatory guide by announcing its availability for comment in the **Federal Register**. However, as explained on page 7 of NRC Management Directive 6.6 "Regulatory Guides," (ADAMS Accession No. ML110330475) the NRC may directly issue a final regulatory guide without a draft version or public comment period if the changes to the regulatory guide are non-substantive.

The NRC is issuing Revision 2 of RG 1.57 (ADAMS Accession No. ML12325A043) directly as a final regulatory guide because the changes between Revision 1 and Revision 2 are non-substantive. The revision was to correct an error in a subsection title on page ten of Revision 1, which referred to the ultimate capacity of concrete containment structures when it should be steel containments, since metal primary reactor containment systems are the focus of this regulatory guide. In addition, Revision 1 specifically referred to Section 3.8.2, "Steel Containment" of NRC's Standard Review Plan for the Review of Safety Analysis Reports for Nuclear Power Plants, NUREG-0800 (ADAMS Accession No. ML100630179) without further elaboration on the application of the guidance. This was corrected by importing the guidance found in NUREG-0800, Section 3, 8.2 into Revision 2 of RG 1.57. This did not change the staff's regulatory guidance. In addition, editorial changes were made to improve clarity and ADAMS Accession Numbers were added in the
