In 2010, the Commission adopted LNP provisioning flows, which include a one-business day porting interval for simple ports of a subscriber's telephone number from one provider to another. In adopting these process flows, the Commission indicated that carrier-assigned passcodes for a customer's account may not be required to be supplied by a new provider in order to obtain a customer service record from another provider. The Commission also clarified that the adopted porting flows would remain in effect until the NANC recommends, and the commission approves, revised provisioning flows for the porting process. On September 19, 2012, the NANC asked the Commission to clarify that the LNP flows and recommendations adopted by the Commission in its LNP Standard Fields Order apply to all ports, not just simple ports, thereby prohibiting the use of a carrier-initiated passcode for any porting request. On December 10, 2012, the NANC asked the Commission to adopt clarifying revisions to LNP
