The NRC cautions you not to include identifying or contact information that you do not want to be publicly disclosed in your comment submission. The NRC will post all comment

Additional Technical Details

TSTF–426, Revision 5, is applicable to all Combustion Engineering-designed nuclear power plants. The proposed change revises various TSs to add a Condition for loss of redundant features representing a loss of safety function for a system or component included within the scope of the plant TSs. It would replace Required Actions requiring either a default shutdown or explicit LCO 3.0.3 entry with a Required Action based on the risk significance for the system's degraded condition.

This notice provides an opportunity for the public to comment on proposed changes to the STS after a preliminary assessment and finding by the NRC staff that the agency will likely offer the changes for adoption by licensees. This notice solicits comment on proposed changes to the STS, which if implemented by a licensee will modify the plant-specific TS. The NRC staff will evaluate any comments received for the proposed changes and reconsider the changes or announce the availability of the changes for adoption by licensees. Licensees opting to apply for this TS change are responsible for reviewing the NRC staff's SE, and the applicable technical justifications, providing any necessary plant-specific information, and assessing the completeness and accuracy of their license amendment request (LAR). The NRC will process each amendment application responding to the notice of availability according to applicable NRC rules and procedures.

The proposed changes do not prevent licensees from requesting an alternate approach or proposing changes other than those proposed in TSTF–426, Revision 5. However, significant deviations from the approach recommended in this notice or the inclusion of additional changes to the

license require additional NRC staff review. This may increase the time and resources needed for the review or result in NRC staff rejection of the LAR. Licensees desiring significant deviations or additional changes should instead submit an LAR that does not claim to adopt TSTF–426, Revision 5.

Dated at Rockville, Maryland, this 7th day of January 2013.

For the Nuclear Regulatory Commission.

Sheldon D. Stuchell,

Acting Chief, Licensing Processes Branch, Division of Policy and Rulemaking, Office of Nuclear Reactor Regulation.

Product history. The Commission added Global Plus 1C to the competitive product list by operation of Order No. 1151.² It concurrently designated the agreements filed in companion Docket Nos. CP2012–12 and CP2012–13 as the baseline agreements for purposes of establishing the functional equivalency of other agreements proposed for inclusion with the Global Plus 1C product. *Id.* at 2. The Agreement that is the subject of this filing is the immediate successor to the agreement approved in Docket No. CP2012–12. *Id.* at 4.

Customers for Global Plus 1C contracts are Postal Qualified Wholesalers (PQWs) and other large businesses that offer mailing services to end users for shipping articles via International Priority Airmail, International Surface Air Lift, Global Express Guaranteed, Express Mail International, Priority Mail International, and/or Commercial ePacket service. *Id.* at 5.

The Postal Service also indicates that the pricing formula relied on for Global Plus 1C contracts is included in Governors' Decision No. 11–6. *Id.* at 5. The Postal Service further asserts that the functional terms of the two agreements are the same and the benefits are comparable. *Id.*

The Postal Service states that prices may differ, depending on when an agreement is signed, due to updated costing information. *Id.* It also identifies other differences in contractual terms, but asserts that the differences do not affect either the fundamental service being offered or the fundamental structure of the Agreement.³ *Id.* at 6.

Sunshine Act Meeting

Notice is hereby given, pursuant to the provisions of the Government in the Sunshine Act, Public Law 94–409, that the staff of the Securities and Exchange Commission will hold a decimalization roundtable discussion on Tuesday, February 5, 2013, in the Auditorium, Room L–002. The meeting will begin at 10:00 a.m. and will be open to the public. Seating will be on a first-come, first served basis. Doors will be open at 9:30 a.m. Visitors will be subject to security checks. This Sunshine Act notice is being issued because a majority of the Commission may attend the roundtable discussion.

The agenda for the roundtable includes opening remarks followed by three panel discussions. The participants in the first panel will address the impact of tick sizes on small and middle capitalization companies, the economic consequences (including the costs and benefits) of increasing or decreasing minimum tick sizes, and whether other policy alternatives might better address the concerns animating Section 106(b) of the JOBS Act. The participants in the second panel will address the impact of tick sizes on the securities market in general, including what benefits may have been achieved, and what, if any, negative effects have resulted. The participants in the third panel will address potential methods for analysis of the issues, including whether and how to conduct a pilot for alternative minimum tick sizes.
