

introduction and dispersal pathways (how a species was transported), ecological impacts (including effects on native, threatened, and endangered species), human impacts (including effects on recreation and water quality), economic impacts (including industry and agriculture), and cumulative impacts. While these species, when present in a nonnative range, can have a significant effect on the environment, the regulatory action (listing) has no significant effect. That each EA resulted in a FONSI strongly suggests that subsequent listings will also have no significant environmental impacts.

(3) *Consistent with existing approved categorical exclusions.* A categorical exclusion for the injurious listing process is consistent with the Service's existing approved categorical exclusions. Categorical exclusions have been approved that address preventing the introduction of nonindigenous species. For example, research, inventory, and information activities directly related to the conservation of fish and wildlife resources are categorically excluded as long as they do not involve, among other things, "introduction of organisms not indigenous to the affected ecosystem" (516 DM 8.5 B(1)).

Next Steps

The establishment of the categorical exclusion is open to public comment. Following review of the comments, the Service will submit the final categorical exclusion to CEQ, which will review it and our responses to public comments for conformity with NEPA and make a recommendation regarding approval of the categorical exclusion. If the categorical exclusion is approved by the Department, the Service will review each subsequent listing rule for the DOI-established extraordinary circumstances that would necessitate the preparation of an EA or an EIS. The Administrative Procedure Act rulemaking procedures and the review of extraordinary circumstances both ensure that the decision to apply the categorical exclusion as part of the NEPA environmental review is informed by input from other Federal agencies, other governmental and Tribal entities, and the public.

Public Comments

Any comments to be considered on this proposed addition to the list of categorical exclusions in the Departmental Manual must be received by the date listed in **DATES** at the location listed in **ADDRESSES**. Comments received after that date will be considered only to the extent

practicable. Comments, including names and addresses of respondents, will be posted at <http://www.fws.gov/injuriouswildlife>. Before including your address, telephone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment, including your personal identifying information, may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

SUPPLEMENTARY INFORMATION:

I. Abstract

The Migratory Bird Treaty Act (MBTA; 16 U.S.C. 703 *et seq.*) implements four treaties concerning migratory birds that the United States has signed with Canada, Mexico, Japan, and Russia. Under the treaties, we must preserve most species of birds in the United States, and activities involving migratory birds are prohibited except as authorized by regulation.

This information collection is associated with our regulations that implement the MBTA. In the Code of Federal Regulations (CFR), 50 CFR 21.43 is a depredation order for blackbirds, cowbirds, grackles, crows, and magpies that authorizes take of these birds "when found committing or about to commit depredations upon ornamental or shade trees, agricultural crops, livestock, or wildlife, or when concentrated in such numbers and manner as to constitute a health hazard or other nuisance."

All persons or entities acting under this depredation order must provide an annual report containing the following information for each species:

- Number of birds taken.
- Months and years in which the birds were taken.
- State(s) and county(ies) in which the birds were taken.
- General purpose for which the birds were taken (such as for protection of agriculture, human health and safety, property, or natural resources).

We collect this information so that we will be able to determine how many

birds of each species are taken each year and whether the control actions are likely to affect the populations of those species.
