

Management (BLM) to transfer unit lands located west of State Highway 205 and other small parcels to BLM. Hunting in the unit will likely continue unaffected by the potential land exchange.

Existing fishing opportunities at Krumbo Reservoir, along the upper Blitzen River, at the southern portion of East Canal, and at Mud and Bridge Creeks will continue, and vehicle access to fishing sites will increase. In addition, the Refuge will develop a pedestrian crossing at Bridge Creek, and open a late-summer bank fishing opportunity on the Blitzen River from Sodhouse Lane to the bridge on Boat Landing Road. Information will be available at fishing areas. At Krumbo Reservoir, triploid rainbow trout stocking will continue, and a redband trout genetic introgression study will be conducted.

We will improve cultural and paleontological resource programs by developing step-down management plans in cooperation with partners. Opportunities for American Indians to collect plants for traditional uses will expand. Monitoring and inventory of archaeological resources and interpretation of historic sites will increase.

We will pursue sustainable practices, energy independence, and carbon negative operations, and emphasize partnerships to maximize adaptive management. Our volunteer program will continue, with emphasis on increasing recruitment, retention, and return rates. Step-down inventory and monitoring plans will be developed, emphasizing focal species and national monitoring efforts. We will create a geodatabase to track data collected during inventory and monitoring efforts.

Dated: March 1, 2013.

Acting Regional Director, Pacific Region,

The Federal coal reserves to be offered consist of all reserves recoverable by surface mining methods in the following described lands in McKinley County, New Mexico:

New Mexico Principal Meridian

T. 17 N., R. 9 W.,
Sec. 34, ALL;

Containing 640 acres more or less.

The tract contains an estimated 9.2 million tons of recoverable coal reserves, occurring in five seams in the Cleary Coal Member of the basal Menefee Formation. The coal is ranked as subbituminous B or C coal. The estimated weighted average quality of all seams (as received) is as follows: 9,856 BTU/lb., 16.5 percent moisture, 13.2 percent ash, 36.9 percent fixed carbon, 33.4 percent volatile matter, and 1.32 percent sulfur. The tract will be leased to the qualified bidder submitting the highest cash offer provided that the high bid meets or exceeds the fair market value of the tracts as determined by the authorized officer after the sale. No bid that is less than \$100 per acre, or fraction thereof, will be considered. This \$100 per acre is a regulatory minimum, and is not intended to reflect fair market value of the tracts.

The sealed bids should be sent by certified mail, return receipt requested, or should be hand delivered to the Cashier, New Mexico State Office, at the address given above and clearly marked "Sealed Bid for NMNM 126813 Coal Sale—Not to be opened before 10 a.m., August 14, 2013." All tie-breaking sealed bids must be within 15 minutes following the sale official's announcement at the sale that identical sealed bids have been received. Prior to lease issuance, the high bidder, if other than the applicant, must pay the BLM the cost recovery fees in the amount of \$107,642.17 in addition to all processing costs the BLM incurs after the date of this sale notice (43 CFR 3473.2). If the high bidder is other than Peabody, the BLM would then refund to Peabody the amount of \$107,642.17 previously paid by Peabody.

There is one qualified surface owner. A consent document from the qualified surface owner has been filed and verified by the BLM and meets the criteria as required by the regulations. A copy of the consent is attached to the detailed statement of sale. The lands within the lease tract which consent is filed are shown below:

T. 17 N., R. 9 W., New Mexico Principal
Meridian
Sec. 34, ALL;

The lease issued as a result of this offering will require payment of an annual rental of \$3 per acre or fraction thereof, and a royalty payable to the United States of 12½ percent of the value of the coal removed from a surface mine and 8 percent of the value of the coal removed from an underground mine. The value of the coal will be determined in accordance with 30 CFR part 1206, subpart F, 1206.250 *et seq.* Bidding instructions for the offered tracts are included in the Detailed Statement of Coal Lease Sale. Copies of the Statement, which includes detailed geological information on the coals and surface owners, are available upon request in person or by mail from the New Mexico State Office at 301 Dinosaur Trail, Santa Fe, NM 87508 or the Farmington District Office at 6251 College Blvd. Ste.
