Substance Abuse and Mental Health Services Administration

Agency Information Collection Activities: Submission for OMB Review; Comment Request

Periodically, the Substance Abuse and Mental Health Services Administration (SAMHSA) will publish a summary of information collection requests under OMB review, in compliance with the Paperwork Reduction Act (44 U.S.C. Chapter 35). To request a copy of these documents, call the SAMHSA Reports Clearance Officer on (240) 276–1243.

Project: Cross-site Evaluation of the Garrett Lee Smith Memorial Suicide Prevention and Early Intervention Programs (OMB No. 0930–0286)—Revision

The Substance Abuse and Mental Health Services Administration's (SAMHSA) Center for Mental Health Services (CMHS) will continue to conduct the cross-site evaluation of the Garrett Lee Smith Memorial Youth Suicide Prevention and Early Intervention State/Tribal Programs and the Garrett Lee Smith Memorial Youth Suicide Prevention Campus Programs. The data collected through the cross-site evaluation addresses four stages of program activity: (1) The context stage includes a review of program plans, such as grantee's target population, target region, service delivery mechanisms, service delivery setting, types of program activities to be funded and evaluation activities; (2) the product stage describes the prevention strategies that are developed and utilized by grantees; (3) the process stage assesses progress on key activities and milestones related to implementation of program plans; and (4) the impact [1] stage assesses the impact of the program on early identification, referral for services, and service follow-up of youth at risk.

To date, 147 State/Tribal cooperative agreement awardees and 153 Campus grantees have participated in the cross-site evaluation since FY 2005. Currently, 61 State/Tribal cooperative agreement awardees and 60 Campus grantees are participating in the cross-site evaluation. Data will continue to be collected from suicide prevention program staff (e.g., project directors, evaluators), key program stakeholders (e.g., state/local officials, child-serving agency directors, gatekeepers, mental health providers, and campus administrators), training participants, college students, and campus faculty/staff through FY2016.

Since the State/Tribal grantees differ from the Campus grantees in programmatic approaches, specific data collection activities also vary by type of program. The following describes the specific data collection activities and data collection instruments to be used across State/Tribal and Campus grantees for the cross-site evaluation. While most of the data collection instruments described below are revised versions of instruments that have previously received Office of Management and Budget approval (OMB No. 0930–0286 with Expiration Date: August 2013) and are currently in use, new instruments include:

- The Training Utilization and Preservation—Survey (TUP–S): 6-Month Follow-up, Adolescent, and Campus Versions
- The Life skills Activities Follow-up Interview (LAI)
- The Coalition Survey
- The Coalition Profile
- The Short Message Service Survey (SMSS)
- The Student Awareness Intercept Survey (SAIS)

The addition of these new data collection activities does not increase the burden associated with the cross-site evaluation because several lengthy instruments, as well as campus case studies, have been removed from the data collection protocol. A summary table of the number of respondents and respondent burden has also been included.

Previously approved instruments that have been removed include:

- The Training Exit Survey (TES) Individual Form for States/Tribes
- The Suicide Prevention, Exposure, Awareness and Knowledge Survey for Students (SPEAKS–S)_
- The Campus Infrastructure Interviews (CIFI)
- Three instruments collected by a subset of Campus grantees
- The Training Utilization and Preservation Interview (TUP–I)

Data Collection Activities for State/Tribal Grantees

For State/Tribal grantees, the Prevention Strategies Inventory State/Tribal (PSI–ST) Baseline and Follow-up, Referral Network Survey (RNS), and the Training Utilization and Preservation—Survey (TUP–S–ST): State/Tribal Version described below are revised versions of instruments that previously received OMB approval (OMB No. 0930–0286 with Expiration Date: August 2013) and are currently in use. The Training Activity Summary Page State/Tribal (TASP–ST), Early Identification, Referral and Follow-up Screening Form (EIRF–S) and the Early Identification, Referral and Follow-up Analysis (EIRF) are data collection activities that utilize existing data sources. The Training Utilization and Preservation Survey (TUP–S): 6-Month Follow-up and Adolescent Versions, the Coalition Profile, and the Coalition Survey are proposed as new data collection instruments.

Prevention Strategies Inventory-State/Tribal (PSI–ST)—Revised: The Prevention Strategies Inventory will collect information on the suicide

[1] The evaluation as designed includes four stages (context, content, process, and impact) each of which is hinged to the fundable activities of the grantees, the research questions outlined in the evaluation statement of work, and the state of the knowledge base in the field of suicide prevention. As such, while the evaluation design does not currently include rigorous impact assessment, it does include the comparative assessment of proximal outcomes as a part of the impact stage. Hereafter, the impact stage is used as an umbrella term to cover evaluation protocols designed and implemented to understand the outcomes of the program.
