Abstract: In 2010, EPA, in concert with its federal partners, began implementation of the Great Lakes Restoration Initiative (GLRI) that was included in the Department of the Interior, Environment, and Related Agencies Appropriations Act, 2010 (Pub. L. 111-88) and subsequent appropriations. The GLRI invests funds in programs and projects strategically chosen to target the most significant environmental problems in the Great Lakes ecosystem. The legislation called for increased accountability for the GLRI and directed EPA to implement a process to track, measure, and report on progress. As part of this process, federal and non-federal entities receiving GLRI funds are required to submit detailed information on GLRI projects into the Great Lakes Accountability System

(GLAS). The information is necessary to provide an accurate depiction of activities, progress, and results. Information is updated on a quarterly basis.

Form Numbers: None

Respondents/affected entities: Great Lakes Restoration Initiative Funding Recipients

Respondent's obligation to respond:

Required for recipients of GLRI funds

Estimated number of respondents: 113

Frequency of response: Quarterly

Total estimated burden: 2,468 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$140,076.16 (per year), which includes no capital investment or operation & maintenance costs.

Changes in Estimates: There is a decrease of 18,195 hours in the total respondent burden compared with the previous ICR. Overall, EPA has a better understanding of how long it takes respondents to complete forms and historical data to project new respondents and active projects over the next three years. Additionally, (1) there is a decrease in the number of respondents due to overestimated figures in the previous information collection; (2) the number of active grants will continue to decrease, as projects are completed and fewer new grants are awarded; and (3) the lower burden hours reflect increased respondent familiarity with the GLAS and the information collection.

SUPPLEMENTARY INFORMATION:

Supporting documents which explain in detail the information that the EPA will be collecting are available in the public docket for this ICR. The docket can be viewed online at www.regulations.gov or in person at the EPA Docket Center, EPA West, Room 3334, 1301 Constitution Ave. NW., Washington, DC. Abstract: The affected entities are subject to the General Provisions of the NESHAP at 40 CFR part 63, subpart A, and any changes, or additions to the Provisions specified at 40 CFR part 63, subpart UUU. Owners or operators of the affected facilities must submit initial notification, performance tests, and periodic reports, and results. Owners or operators are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. Reports, at a minimum, are required semiannually.

Form Numbers: None.

Respondents/affected entities: Owners or operators of petroleum refineries.

Respondent's obligation to respond: Mandatory (40 CFR part 63, subpart UUU).

Estimated number of respondents: 123 (total).

Frequency of response: Initially and semiannually.

Total estimated burden: 10,237 hours (per year). "Burden" is defined at 5 CFR 1320.3(b).

Total estimated cost: \$9,399,440 (per year), includes \$8,398,136 annualized capital or operation & maintenance costs.

Changes in the Estimates: There is an adjustment decrease in the respondent and Agency labor hours in this ICR compared to the previous ICR. The decrease occurred because all sources have met the initial compliance requirement and, therefore, will not incur burden associated with initial notification and performance test during the three-year period of this ICR. The decrease also resulted from a reduction in the respondent universe from 132 to 123 major source facilities. The estimate was obtained from EPA's non-CBI Component 1 Section 114 ICR database and is based on 2010 data.

However, there is an overall increase in respondent labor costs due to an adjustment in labor rates. This ICR uses updated labor rates in calculating all costs. There is also an increase in the total O&M costs due to an update in the estimated number of sources.

Director, Collection Strategies Division.
