

DEPARTMENT OF AGRICULTURE**Rural Utilities Service****Announcement of Grant Application Deadlines****AGENCY:** Rural Utilities Service, USDA.**ACTION:** Notice of Funds Availability (NOFA).

SUMMARY: The Rural Utilities Service (RUS) is announcing a special Fiscal Year (FY) 2014 application window for a Colonias Needs Assessment to be completed through the Technical Assistance and Training Grant Program (TAT). In 2013, RUS partnered with EPA to launch a USDA/EPA Mexico Border Needs Assessment and Support Project. The five-phased project intends to identify small communities' gaps in water and wastewater infrastructure development and in technical capacity in the Mexico Border region. Once the gaps are identified, the project intends to support appropriate water and wastewater infrastructure projects that meet the specific needs of small communities. The ultimate goal would be to reduce health risks and increase economic development in Colonias regions. Phase 1 is completed and consisted of RUS/EPA research and collection of data related to socio-economic factors, public health and Federal and State investments in infrastructure in Colonias regions. Phase 2 of the project is to conduct a detailed assessment of water and wastewater infrastructure needs in select Colonias areas in four states, including California, New Mexico, Arizona and Texas. The areas of focus for the study are further defined in the application guide and are those where Phase I data showed highest health, environmental and economic challenges. Through this announcement RUS seeks applications to conduct the needs assessment and provide a detailed accounting of results that will enable RUS and EPA to advance to Phase 3 of the project. The grant will have a start date of July 1, 2014 and end on December 31, 2014.

The study will be done only in the colonias areas. For RUS programs, Colonia is defined as a community that (1) is in the state of Arizona, California, New Mexico, or Texas; (2) is within 150 miles of the U.S.-Mexico border, except for any metropolitan area exceeding one million people; (3) on the basis of objective criteria, lacks adequate sewage systems and lacks decent, safe, and sanitary housing; and (4) existed as a colonia before October 1, 1989. However, the needs assessment may include other rural areas classified as

Colonias by other state and Federal agencies. RUS intends to award one grant to an eligible entity for up to \$500,000. The grantee will be expected to commence work July 1, 2014 and submit all deliverables by December 31, 2014

I. Funding Opportunity

The U.S.-Mexico Border Region is a dynamic area where public health and environmental challenges are interconnected, populations intermingle, and water resources are shared by both countries. USDA and EPA work collaboratively with partners to address critical public health and environmental problems at the source by providing often first-time drinking and wastewater services to underserved communities. The agencies have embarked on a joint project to improve estimates of gaps in community infrastructure and to pilot approaches to technical assistance and capacity building that can be applied more broadly and be provided in a manner that can be sustained long term by building capacity in the communities to improve and maintain adequate infrastructure. Ultimately, the project will identify and vet approaches to support small communities that can be supported cooperatively by all stakeholders.

The Rural Utilities Service (RUS) supports the sound development of rural communities and the growth of our economy without endangering the environment. RUS provides financial and technical assistance to help communities bring safe drinking water and sanitary, environmentally sound waste disposal facilities to rural Americans in greatest need.

The additional funding for the Colonias Studies, under the TAT Grant Program, will allow colonias communities to better plan and secure dependable water supplies for rebuilding their community's health and economic development. Qualified private non-profit organizations may apply to receive a grant to conduct water infrastructure studies to evaluate infrastructure gaps, determine local stakeholders and institutions, access community funding opportunities and provide technical support to colonias communities.

Deliverables required under this colonias TAT grant are:

1. Creation of a searchable database of information required to be collected as part of the needs assessment. A full list of the information collection requirements is detailed in the application guide, and includes such data as population, general demographics, existing water and waste disposal infrastructure, incidence rate of water borne infectious disease, assessment of access to indoor plumbing, etc. The database must include geospatial information that allows for mapping.

2. A report (in electronic and paper form) summarizing and analyzing the data collected that:

- Identifies areas of greatest need and where investment will have highest economic and public health impact (including maps).

- Identifies areas that lack access to water and/or waste disposal infrastructure.

- Estimates the capital investment needed in water and waste disposal infrastructure in the study area (modest in scope and design). The estimate should include a listing of each colonia assessed, identification of the type of infrastructure required and the recommended approach (i.e., connection to existing system, new cluster system, centralized system and estimated capital costs).

- Provides information on communities' capacity to apply for funding, and operate and maintain utilities.

- Identifies the areas where other technical assistance is needed and for what purposes;

3. Lists of local institutions/ community leaders that can serve as points of contacts for the targeted communities.

4. Recommends approaches for technical assistance and outreach to communities in high needs areas.

5. This report is due by December 31, 2014.

II. Award Information

Available funds: \$500,000.

SUPPLEMENTARY INFORMATION:

Background

Section 723(a)(1) of the Defense Production Act of 1950, as amended (DPA) (50 U.S.C. app. § 2172 (2009)) requires the President to submit an annual report to Congress on the impact of offsets on the U.S. defense industrial base. Section 723(a)(2) directs the Secretary of Commerce (Secretary) to prepare the President's report and to develop and administer the regulations necessary to collect offsets data from U.S. defense exporters.

The authorities of the Secretary regarding offsets have been delegated to the Under Secretary of Commerce for Industry and Security. The regulations associated with offsets reporting are set forth in part 701 of title 15 of the Code of Federal Regulations. Offsets are compensation practices required as a condition of purchase in either government-to-government or commercial sales of defense articles and/or defense services, as defined by the Arms Export Control Act and the International Traffic in Arms Regulations. For example, a company that is selling a fleet of military aircraft to a foreign government may agree to offset the cost of the aircraft by providing training assistance to plant managers in the purchasing country. Although this distorts the true price of the aircraft, the foreign government may require this sort of extra compensation as a condition of awarding the contract to purchase the aircraft. As described in
